## Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports, are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 63d Congress, 2d session, is to be understood.

## SALES OF GOVERNMENT PUBLICATIONS

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge, the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents, are indicated by a star (\*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (§) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

### MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, \$1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

### LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and  $\frac{1}{2}$ c. for each additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

## INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate numbers can not be supplied.

## HOW TO REMIT

Remittances for the documents marked with a star (\*) should be made to the Superintendent of Documents, Washington, D. C., by postal money order, express order, or New York draft. Currency if sent will be at sender's risk.

Postage stamps, foreign money, and defaced or smooth coins are not acceptable.

No charge is made for postage on documents forwarded to points in the United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

The issue of coupons redeemable in public documents by the Superintendent of Documents has been discontinued. Holders of coupons are requested to return the same for redemption.

## NOTES OF GENERAL INTEREST

The annual list of Radio stations of the United States for July, 1914, is in press. It contains, in addition to the data concerning Government, commercial, and special stations, a list of the amateur radio (wireless) stations of the United States. Corrections for the amateur list will not be given in the quarterly statements by which the annual list will be supplemented during the present fiscal year. As information concerning the amateur stations is of no particular value to the Navigation Bureau, printing it once a year, as a matter of general information and convenience, is thought to be sufficient.

The tangible rewards of teaching, a detailed statement of salaries paid to the several classes of teachers and school officers, is the title of Bulletin 16, series of 1914, Education Bureau. This will deeply interest a large class of public servants who are generally understood to be not very well paid. The fact that much information was supplied in confidence, not to be published, diminishes the value of the bulletin somewhat, but still that which was openly supplied and is now published is extensive and will enable comparisons to be made by which in the end many teachers may be benefited. Sold at 50 cents by the Superintendent of Documents.

The Joint Commission to Investigate the Purchase of American-Grown Tobacco by Foreign Governments, which was appointed late in 1912, with Senator Martin of Virginia as chairman, has published a small pamphlet report of hearings before the Commission. Copies can be secured only from the Commission.

Department Bulletin 118, a contribution from the Entomology Bureau, Agriculture Department, announces the important demonstration that common commercial borax is the most effective, economical, and practical of the numerous larvicides that have been tested as destroyers of the maggot of the house fly before its development into the mature fly. It does not lessen the value of the fertilizer in which the maggots have their habitation. As borax is cheap and plenty, this demonstration is of unusual value. The Bulletin describes methods of use, etc. 10 cents.

The Commission on National Aid to Vocational Education, of which Senator Hoke Smith is chairman, has made a report in 2 volumes, vol. 1 being the Report proper and vol. 2 a transcript of the hearings held. The Commission was appointed by authority of Senate joint resolution 5 (Public resolution 16) Jan. 20, 1914, which required that the Commission have nine members and that it report its findings and recommendations not later than June 1, 1914. The appropriation made was \$15,000. The President appointed the Commission by personal letter to each member, all bearing date Feb. 17, 1914. The members are: Senator Hoke Smith of Georgia, Senator Page of Vermont, Representative Hughes of Georgia, Representative Fess of Ohio, Mr. John A. Lapp, director of the Indiana Bureau of Legislative Information; Miss Florence M. Marshall, Director Manhattan Trade School, New York; Miss Agnes Nestor, President International Glove Workers' Union, Chicago; Mr. Charles A. Prosser, Secretary National Society for the Promotion of Industrial Education, New York; and Mr. Charles H. Winslow, special agent, Bureau of Labor Statistics, Washington. Notwithstanding the limited time allowed, the Report is apparently a thorough-

going document, giving much information and making recommendations that must command attention. A staff of 45 assistants was employed. The set of 2 vols., 30 cents. The supply is limited.

The Biological Survey Bureau, Agriculture Department, has issued two Service and regulatory announcements, the 1st, dated July 21, promulgating Regulations for the protection of deer, moose, caribou, sheep, and mountain goats in Alaska; the 2d, July 23, proposing amendments of the regulations of Oct. 1, 1913, for the protection of migratory birds. As required by law, these amendments must be made public three months before they are to be put in force. During these three months the Agriculture Department will receive and consider petitions and briefs from persons interested and hold hearings. As finally approved, the new regulations will take effect on or after Oct. 1, 1914, when approved by the President.

Farmers' bulletin 611 is the Agricultural outlook for July. It states that the composite condition of all crops of the United States on July 1, 1914, was about 8.7 per cent. better than the outturn of crops last year.

Examination papers for admission to the United States Naval Academy, April, 1907–April, 1914, have been printed in a pamphlet for general information. They show the young candidate what tough questions have been asked; but they do not show him what tougher questions remain to be asked. Copies are supplied by the Superintendent of the Academy.

The first (1913) number in the United States Geological Survey's new annual series, Shorter contributions to general geology, has been issued as Professional paper 85. It is made up of five expert papers, with preface and index. From the Superintendent of Documents, 25 cents.

Fifteen cents to the Superintendent of Documents will bring a new and brilliantly illustrated pamphlet entitled Origin of the scenic features of the Glacier National Park.

The Interstate Commerce Commission has printed a new set of Regulations for the transportation of explosives and other dangerous articles, to become effective Oct. 1 next. 20 cents.

The tenure of the United States Commission on Industrial Relations expires by limitation Aug. 23, 1915, that date being three years from the date of approval of the law creating the Commission. There was delay in making the nine appointments of members of the Commission and of course additional delay in organizing, finding the right material for the staff, and planning the work, so that now little more than a year of life remains to the Commission—unless Congress sees fit to extend its term. It has thus far issued but one publication, a pamphlet of 16 pages entitled Tentative proposals for consideration on the question of public and private employment offices. These proposals are published for the purpose of eliciting criticisms and suggestions, which are invited. Presumably the Commission will publish a report, but this can hardly be written until its work has been completed. The Commission has been lately holding hearings in Chicago.

The Bureau of Construction and Repair, Navy Department, has in press a 7th edition of the Flags of maritime nations. All the national flags of the world will be shown in their actual colors. The colored lithographic plates will in fact make up nearly the whole of the book, though there will be some descriptive text. The date of publication has not yet been announced. Copies will be on sale by the Superintendent of Documents at \$2 or less. The last previous issue was dated 1899, though there were some reprints of later date.

Senate document 719, 62d Congress, now in press, is a compilation of laws, agreements, Executive orders, proclamations, etc., relating to the Indian inhabitants of the United States, negotiated and enacted from Dec. 1, 1902, to 1913.

It is virtually a 3d volume of Kappler's 2-volume set of Indian laws and treaties. The Superintendent of Documents will have copies of the new volume for sale and has also still in stock vols. 1 and 2 at \$2 each. The price of vol. 3 will be announced later. It will not be available for sale in less than 30 days and delivery is not guaranteed even that soon.

Chapter 12, vol. 2, Report of commissioner of education for 1913, is entitled Statistics of commercial schools. One interesting feature of this chapter is a list of stenographers in Executive Departments at Washington, D. C., using various systems of shorthand writing. There are 2,444 stenographers and they use 79 different systems of writing. The figures probably understate rather than overstate the actual conditions. It is no wonder the stenographers cannot read each others' notes.

The Census Bureau is reprinting all of the State supplements of the 1910 Census returns which were issued at first with copies of the Abstract. The new reprints are in gray paper and have title-page, contents, and index to the Abstract that were not in the first print. Advantage has also been taken of the opportunity to correct any errors that have been discovered in the statistics. The new print will *not* be sold by the Superintendent of Documents.

Farmers' bulletin 597, The road drag and how it is used, a contribution from the Public Roads Office, expresses the unqualified opinion of that office thus: "The road drag is the simplest and least expensive contrivance yet devised for maintaining roads constructed of earth or earthy materials." The pamphlet is liberally illustrated. Price 5 cents.

An unusually important and interesting illustrated Farmers' bulletin is number 591, The classification and grading of cotton. The price is 5 cents.

The 1913 volume of the Decisions of the commissioner of patents and of the United States Courts in patent and trade-mark and copyright cases is out of press. Price \$1.00 in paper and \$2.00 in cloth. These prices were not fixed by the Superintendent of Documents.

There is a 3d edition of the Catalogue of coins, tokens, and medals of the numismatic collection of the Mint of the United States at Philadelphia, which has proved to be a very popular book. It has 694 pages of text and is profusely illustrated. The Superintendent of Documents has sold hundreds of copies and can still supply them at \$1.00 each.

The Interstate Commerce Commission report on the New York, New Haven, and Hartford Railroad Co. has been printed, with evidence, as Senate document 544, 63d Congress. It is generally considered to be the most caustic report ever made by the Commission. July 15 the Senate ordered 10,000 copies of the report, without the evidence, to be printed "for the use of the Senate document room." This last clause means that they will not be divided among the Senators pro rata, but on the principle of "first come, first served."

July 30 the Interstate Commerce Commission released for general distribution an important little document which had been printed confidentially. The title is National code of rules governing the weighing and reweighing of car-load freight. It is now on the sales list of the Superintendent of Documents. Single copies, 5 cents.

Another important confidential publication released on the same day is Bureau of Animal Industry order 211. Regulations governing the meat inspection of the Department of Agriculture, effective Nov. 1, 1914, except regulation 27, effective Jan. 1, 1915. 10 cents.

In March and April, 1913, volumes 1 and 2 of Review of Forest Service investigations were published. Because of changes in the plans of publication of the Agriculture Department, it is not likely that any other numbers of the Review will be published. It was planned as a professional rather than a popular

publication. It was intended that it should deal with matters on which the Forest Service cannot yet speak authoritatively. A certain freedom was given for the expression of individual opinion. The views presented are for professional consideration on their merits and full responsibility for them is not assumed by the Forest Service. The volumes issued are liberally illustrated. Copies are on sale by the Superintendent of Documents at 15 cents each.

The Forest Service of the United States, which is a bureau of the Agriculture Department at Washington, also maintains the following-named auxiliary establishments: Forest products laboratory, Madison, Wis.; Ground wood laboratory, Wausau, Wis.; Wood testing laboratory, Seattle, Wash.; Experiment station on the Kaniksu national forest, Priest River, Idaho; Experiment station, Cloquet, Minn.; Experiment station on the Pike national forest, Manitou, Colo.; Experiment station on the Rio Grande national forest, Wagon Wheel Gap, Colo.; Experiment station on the Coconino national forest, Flagstaff, Ariz.; Experiment station on the Manti national forest, Ephraim, Utah; Experiment station on the Plumas national forest, Quincy, Cal.; Seed-testing laboratory and willow-holt station, Arlington farm, Washington, D. C.; Dendrological laboratory, Washington, D. C.

The 1st Report of the Public Utilities Commission of the District of Columbia has been released from confidence and is now on sale by the Superintendent of Documents at 25 cents. Judging from inquiries received, this report has excited more than a merely local interest.

A new edition of the Signal book, U. S. Army, is in press. It will not carry the designation "Circular 7" as former editions have done.

Decisions of the Comptroller of the Treasury will hereafter be published in monthly, quarterly, and annual editions. Monthly issues will appear for July, August, October, November, January, February, April, and May. Quarterly editions will appear in September, December, and March. The annual edition will bear date in July. There will be 8 monthlies, 3 quarterlies, and one annual for each year.

National and State indebtedness and [productive] funds and investments, 1870 to 1913, is the title of an important compilation lately published by the Census Bureau. The word "productive" does not appear on the title-page but is found in the letter of transmittal, and evidently belongs. Sold by the Documents Office at 40 cents.

#### CANDLERS AND BUSHELMEN

The "Egg candling chart" is one of the latest enterprises of the Chemistry Bureau, Agriculture Department. It consists of 16 portraits in the natural colors of hens' eggs of various grades, from the delectable egg of absolute freshness to the addled egg of odoriferous conditions. Each egg depicted is shown as it looks in the shell "before the candle" and also as it looks when taken from the shell. For use in illustrating Department Bulletin 51, "A bacteriological and chemical study of commercial eggs in the producing districts of the central West," the chart has been cut up into 8 full-page plates, each containing 2 colored portraits of one egg, showing it in the shell and out. The bulletin has 77 pages of text, describing the various misadventures which may befall an egg in the course of its travels, telling how to detect the presence of these maladies, and whether eggs presenting any of the various appearances shown in the chart should be marketed as "fresh," should be sent to the "breakers," or should be discarded as impossible. The "breakers" are concerns which take eggs out of their shells and freeze or dry them for use by bakers or others who use large numbers of eggs in manufactures.

Candlers are persons who examine eggs when held up before a light. Formerly this light was a candle and the places of use were the dark cellars under country stores. Thus the terms "candling" and "candler" originated. Bulletin 51 recommends an electric bulb as the proper light to be used by "candlers" in "candling" nowadays, but still adheres to the old terms. "Candling" has grown into a calling in which many persons are employed and in which much expertness has been developed. The plates show just what the "candlers" see in their work and what these sights mean to them. The name is a somewhat curious survival of a trade term after the conditions under which it originated have been much changed. Perhaps an even more curious instance of a similar survival is the term "bushelman" in the tailoring trade. Years and years ago the tailors who were employed to make the slight changes and repairs immediately required in men's clothes for which customers were waiting found that the handiest thing to curl up on was the bottom of a half-bushel measure. It was smooth and the right size and it came into general use. Hence the name "bushelman," which survives though the half-bushels have mostly disappeared.

What have bushelmen to do with eggs? Nothing at all. So we return to Bulletin 51. It is the first of a series of reports resulting from the investigation of frozen and dried eggs now making by the Food Research Laboratory of the Chemistry Bureau, Agriculture Department. The Laboratory, which is located in Philadelphia, is under the direction of Dr. Mary Engel Pennington, a chemist and bacteriologist of extended experience and one of the best-paid women in the Government service.

The egg of the domestic fowl has been from time immemorial and still is one of the most important foods of mankind in all parts of the world. Whether reading Bulletin 51 will increase or diminish the appetite for this food must depend entirely on the reader. The bulletin is sold by the Superintendent of Documents at 40 cents. The price of the chart alone is 30 cents.

## SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis*, except as otherwise indicated. Publications should be ordered by the publication number, and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1, Smithsonian contributions to knowledge; 2, Smithsonian miscellaneous collections; 3, Smithsonian reports. No sets of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and

Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the Smithsonian Institution. Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress. The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution.

\* Document for sale by Superintendent of Documents.

† Distribution by office issuing document, free if unaccompanied by a price.

‡ Document not obtainable.

## Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports, are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 63d Congress, 2d session, is to be understood.

## SALES OF GOVERNMENT PUBLICATIONS

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge, the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents, are indicated by a star (\*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

### MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, \$1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

### LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and  $\frac{1}{10}$ c. for each additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

## INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate numbers can not be supplied.

## HOW TO REMIT.

Remittances for the documents marked with a star (\*) should be made to the Superintendent of Documents, Washington, D. C., by postal money order, express order, or New York draft. Currency, if sent, will be at sender's risk.

Postage stamps, foreign money, and defaced or smooth coins are not acceptable.

No charge is made for postage on documents forwarded to points in the United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

The issue of coupons redeemable in public documents by the Superintendent of Documents has been discontinued. Holders of coupons are requested to return the same for redemption.

## NOTES OF GENERAL INTEREST

Standards Bureau's Circular 49 is Safety rules to be observed in the operation and maintenance of electrical equipment and lines. The compilation has been worked out by long study and comparison of existing systems and with the cooperation of various organizations, officials, and experts. Analysis of electrical accident data shows that a large proportion of the accidents are preventable by the adoption of proper precautions. This compilation is intended to meet an urgent demand for a standard set of safety rules that will lessen the risk in handling and taming the very useful and very deadly sort of energy known as electricity. Copies are sold by the Superintendent of Documents at 15 cents.

The yea-and-nay votes in the Senate on amendments to the present tariff law have been compiled and published as Senate document 556, 63d Congress.

A document of immediate as well as permanent interest is Senate document 563, 63d Congress, Declaration of International Naval Conference held at London, Dec. 4, 1908-Feb. 26, 1909, with opinion of Cone Johnson, solicitor for State Department, relative to transfer of merchant ships during war, 10 cents.

The subject of the creation of a bureau of labor safety in the Labor Department, as proposed by House bill 10735, drew out an able and interesting report from the House Labor Committee, which was adopted and reprinted as its own by the Senate Education and Labor Committee. Two such strongly favorable committee reports give the bill (House 10735) a fine start and if it does not pass immediately it is likely to do so at no distant day. The object of the proposed bureau is to promote the adoption and use of more efficient safeguards in the various mechanical occupations and thus to reduce the frightful waste of life which is now going on and has been going on for many years, constantly crying out for preventive measures.

Decisions of various kinds are out in new volumes. Treasury decisions, which relate mainly to cases arising under the tariff and internal revenue laws, are out in vol. 26, covering the half year January to June, 1914. Price \$1.50. The Decisions of the Comptroller of the Treasury, which are quite different things from the Treasury decisions, have reached their 20th volume, in which are gathered all of the decisions supposed to be of permanent value which were rendered during the fiscal year 1914. The price of this volume also is \$1.50. Both are bound in buckram.

The Publications Division, Commerce Department, has begun the issue of a Monthly list of publications of the Department, no. 1 bearing date July, 1914.

Waste of oil and gas in the mid-continent fields is the title of Mines Bureau Technical paper 45. The waste is not going on as prodigally as it did when the discovery of these sources of energy was new, but there is still a great amount of it. It is a pity that these valuable sources of power, which have been forming in nature's laboratories for ages should be liable to be dissipated in hours by careless and unthrifty men. 10 cents.

Special agents series 87, South American trade in canned goods, is one of the new publications of the Foreign and Domestic Commerce Bureau. It shows that the goods of American canneries have not thus far gained much of a foothold in South America. A big field there remains to be conquered, and the present seems to be the best time to begin the conquering.

In United States naval medical bulletin, vol. 8, no. 3, is an extended and profusely illustrated article on the New method of physical training in the Navy. It is a timely contribution, as interest in physical training seems to be uncommonly active at present. Price, 25 cents.

Part 4 of the Corporation's Bureau very comprehensive report on The lumber industry has been issued. It is a volume of almost one thousand pages of text and a fair number of illustrations. Parts 2 and 3 are not yet out of press. The price of Part 4, in paper covers, is \$1.50.

The American nautical almanac for 1916 is now on sale by the Superintendent of Documents at the usual price, 30 cents.

The third volume of Kappler's Indian affairs, laws, and treaties, has been published as Senate document 719, 62d Congress, 2d session, the entry for which appears on page 102 of this catalogue. The resolution providing for the issue of this supplementary volume, completing the record to Dec. 1, 1913, provided also that 500 copies should be supplied to the Superintendent of Documents for sale, thus enabling buyers of vols. 1 and 2 to complete their sets. The new volume is now in stock, bound in paper, price \$1.50. Vols. 1 and 2, bound in sheep, are also still in stock at the price of \$2.00 each.

#### STAR-SPANGLED BANNER CENTENNIAL

This is the centennial year of the writing of the Star-spangled banner by Francis Scott Key. Among the various events commemorative of the centenary of the song most generally accepted as the chief of American patriotic songs, not the least, and in fact the one likely to be most enduring of all, is the new and much enlarged edition of Mr. Sonneck's treatise on the Star-spangled banner. This was first printed in 1909 as a part of the author's "Report" on American patriotic songs, including "Star-spangled banner," "Hail Columbia," "America," and "Yankee Doodle." The new historical sketch is wholly given up to the "Star-spangled banner," and includes a collection of the known facts relating to the tune as well as to the song. The original title of the tune was "To Anacreon in Heaven."

Mr. Sonneck's second gleaning of the field has been fruitful. The first yielded 36 pages of text and illustrations. The second increases the text to 115 pages and the number of plates to 27. The plates are chiefly photographic reproductions of the title-pages of various editions of the famous song, but include also, as frontispiece, a fine and authentic portrait of the author of the immortal words. There is also a portrait of the presumptive composer of the music.

It may seem a rash statement that a mere book of paper and cloth is likely to be a more enduring memorial than a monument of granite and bronze. But it is not rash. It simply takes into consideration that this is the age of libraries. Only works of art are now preserved and cared for like books. Though not imperishable in themselves, they are housed in fireproof and otherwise as imperishable structures as the skill of man has been able to construct. Take this fact in connection with the other fact that books are duplicated in great numbers, so that many copies are preserved in many imperishable places, one may easily conclude that a worthy book has at least as many chances for immortality as any other of the works of man.

This timely and important work has been placed in the hands of the Superintendent of Documents for sale. It is well bound in red cloth and priced at 85 cents.

### Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States, The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The usual size, exclusive of the margin is about 17.5 inches in height by 11.5 to 16 inches in width, the latter varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

Nearly two-fifths of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 10c. each; but in lots of 50 or more copies, whether of the same sheet or of different sheets, the price is 6c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

## SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis*, except as otherwise indicated. Publications should be ordered by the *publication number*, and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1. Smithsonian contributions to knowledge; 2. Smithsonian miscellaneous collections; 3. Smithsonian reports. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress." The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution.

\* Document for sale by Superintendent of Documents.

† Distribution by office issuing document, free if unaccompanied by a price.

‡ Document not obtainable.

## Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports, are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 63d Congress, 2d session, is to be understood.

## SALES OF GOVERNMENT PUBLICATIONS

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge, the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents, are indicated by a star (\*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (§) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

### MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, \$1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

### LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and 1½c. for each additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

## INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate numbers can not be supplied.

## HOW TO REMIT

Remittances for the documents marked with a star (\*) should be made to the Superintendent of Documents, Washington, D. C., by postal money order, express order, or New York draft. Currency, if sent, will be at sender's risk.

Postage stamps, foreign money, and defaced or smooth coins are not acceptable.

No charge is made for postage on documents forwarded to points in the United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

The issue of coupons redeemable in public documents by the Superintendent of Documents has been discontinued. Holders of coupons are requested to return the same for redemption.

## NOTES OF GENERAL INTEREST

Bulletin 148, Labor Statistics Bureau, containing the Labor laws of the United States and also of the several States, with decisions of the courts relating thereto, up to the close of the year 1913, is in course of publication in parts, Part 1, filling 1216 large pages, having been already received. This part contains the legislation of the States in alphabetical order from Alabama to Missouri. Part 2 will have the similar material from Montana to United States, and will fill about the same number of pages. This important compilation gives the full text of labor legislation and a digest of the court decisions by which it has been construed. This is the 5th compilation of the kind which has been made by the Labor Bureau (now Labor Statistics Bureau), but the latest previous one was issued in 1907, and the succeeding seven years have been full of activity in the field of labor legislation. Nine States now have minimum-wage laws, though the central government at Washington has not yet taken that step. The States which have done so are California, Colorado, Massachusetts, Minnesota, Nebraska, Oregon, Utah, Washington, and Wisconsin, while Ohio, though it has no such law at present, has adopted a new constitution which authorizes it. There are many new laws relating to the inspection and regulation of factories and mines and to various features of railroad administration.

A prodigious book is House document 226 of the 63d Congress, 1st session, being 4½ inches thick, the greater part of this bulk being, however, taken up by maps. Its title is Water terminal and transfer facilities, and its substance is reports by Army engineer officers on the condition and present and prospective commercial value of the existing facilities for water transportation in this country.

By House resolution 593, 63d Congress, 2d session, it was directed that 5,000 copies of the report of the Proceedings of the First and Second International Peace Conferences, held at The Hague, 1899 and 1907, be printed as House document 1151, 63d Congress, 2d session.

Senate document 537, 63d Congress, 2d session, is a report of the memorial exercises held at Nashville, Apr. 9, 1912, by the Southern Commercial Congress, in honor of the late Seaman A. Knapp, who was warmly eulogized as the man who brought the modern conception of agriculture to the South and sowed seed that is now bearing an abundant harvest.

Census Bulletin 126 is Financial statistics of cities having a population of over 30,000. These are the figures of income and outgo for the fiscal year 1913. As there are now 199 cities of over 30,000 population, and as 55 of them are under the commission plan of government, the opportunities which these statistics afford for comparison and deduction are extensive.

Our mineral reserves, how to make America industrially independent, is a monograph by Dr. Geo. Otis Smith, Director of the United States Geological Survey, published as Bulletin 599 of that notable Government organization. Dr. Smith says at the very outset that "the United States is not only the world's greatest producer of mineral wealth, but, so far as estimates of the earth's treasures have shown, it possesses greater reserves of most of the essential minerals than any other nation." Then follow many sentences that invite quotation. "A geologic map is a graphic inventory both of the mineral resources

now used and of those that are untouched because they are at present of no value. He is indeed a bold prophet, however, who pretends to forecast either the probability or improbability of future usefulness of any raw material. As has been illustrated by the radium mineral carnotite, the mineralogic curiosity of one decade may become the valuable ore of the next. The principal ore of aluminum, bauxite, was not even mentioned in a list of useful minerals published by the Geological Survey 25 years ago." "The value of the mineral production of the United States now reaches \$2,500,000,000 a year." No other country can compete with us in abundance or variety of mineral resources. "The only essential minerals of the first rank of which the United States has no known supply at all commensurate with its needs are nitrates, potash salts, tin, nickel, and platinum. Probably no other nation in the world so nearly approaches absolute independence in respect to mineral resources." Bulletin 599 considers each important mineral product separately, showing production, consumption, uses, etc. Sold by the Superintendent of Documents at 5 cents.

American manufacturers and exporters who hope to acquire a South American trade will do well to get a copy of the Daily consular and trade reports for Aug. 28, 1914, and read with care the 4-page chapter entitled Important details in South American trade. Apparently North American methods must be somewhat modified to win success in South America.

Miscellaneous series 17, Foreign and Domestic Commerce Bureau, is a list of the publications on Latin America and the West Indies which that bureau has published. They are both numerous and useful. Sold by the Superintendent of Documents at 5 cents.

The sale of Post Office Department post-route and county maps has been transferred from the Disbursing Clerk of the Department to the Finance Division, Office of the Third Assistant Postmaster General.

The relation of the horsepower to the kilowatt is the title of Standards Bureau Circular 34, 2d edition. The relationship spoken of is a practical matter, and the determination by the Standards Bureau that a horsepower is the equivalent of 746 watts is also a practical matter. It agrees with the English standard and disagrees with the French and German standards. "Modern practice," says the circular, "is tending toward the more general use of the kilowatt and the disuse of the horsepower." This usage is recommended by the Bureau.

Banking and credit in Argentina, Brazil, Chile, and Peru is a recent publication of the Foreign and Domestic Commerce Bureau that has been and is in active demand. It is known as Special agents series 90 and sells for 10 cents.

Farmers' bulletin 609, Bird houses and how to build them, is authority for the statement that birds may be kept around our houses at all seasons of the year if their human friends will supply the needs of their small housekeeping. In winter they are often unable to find food. If this want is supplied they will stay with us always. If we provide for them comfortable winter houses they will occupy them. To help about this the bulletin gives drawings and descriptions of convenient and inexpensive bird houses.

In pursuance of its duty of establishing scientific standards for all sorts of utilitarian operations the Standards Bureau has issued its Circular 48, Standard methods of gas testing, 1st edition, a quarto of 180 pages, sold by the Documents Office at 35 cents.

The Monthly summary of commerce and finance of the United States has become the Monthly summary of foreign commerce of the United States. The new title appears first on (and in) the number for July, 1914, which is no. 1, series 1914-15. The statistics which it contains are for the month of July,

1914, and for the 7 months ending July, 1914, corrected to Sept. 4, 1914, and subject to revision.

With the exception of India, China is the greatest importer of cotton goods in the world, and Manchuria has long been one of the best markets for American cotton goods. In recent years, however, Japanese competition has seriously curtailed American sales in that field. The chief factors in the development of the cotton industry in Japan and that country's success in the Chinese market are summarized in a bulletin (Special agents series 86) issued in Aug. 1914, by the Bureau of Foreign and Domestic Commerce. It is a detailed study of the Japanese cotton industry by W. A. Graham Clark. From the Superintendent of Documents, 30 cents.

#### THE BIGGEST RECORD

The Congressional record, carrying the report of the proceedings of the 63d Congress, 2d session, which began Dec. 1, 1913, and is still sitting, has reached more than 250 daily numbers and 17,000 pages.

It will be known as volume 51, but will comprise nearly or quite 20 "parts," each part being a volume of about 1,000 pages. And these are not ordinary pages. They are double-column quartos and filled with a very compact type.

Each page contains fully three times as many words as are in a page of an ordinary book. A hasty calculation gives about 35,000,000 words in the 17,000 pages.

And the end is not yet.

#### MORE NEW MILITARY PUBLICATIONS

The Superintendent of Documents has just published a new edition of his Price list 19, Public documents appertaining to the Army and the organized militia of the United States. This list was intended to include the titles and prices of the military publications up to the moment of printing. And so it did. But as luck would have it, the very next day after the new list was put on the press several important new issues of the War Department, of which the Documents Office had no previous notice, were received. Mention is made of them here, and will be also in the Supplement to the new edition of Price list 19, that will evidently soon be called for.

Questions used in the competitive examination held in May, 1914, for the purpose of determining the mental qualifications of candidates for appointment as probational second lieutenants in the Corps of Engineers.

Regulations for the uniform of the United States Army. Revised edition. 1914. Paper, 10c.

Rules of land warfare. Fabrikoid, 50 cents.

Signal book, Army, 1914. (Supersedes Circular 7, 1912, revised Mar. 1913.) Cloth, 30 cents.

Tables of organization, organized militia, 1914, peace. Paper, 10 cents.

### Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The usual size, exclusive of the margin, is about 17.5 inches in height by 11.5 to 16 inches in width, the latter varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

Nearly two-fifths of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 10c. each; but in lots of 50 or more copies, whether of the same sheet or of different sheets, the price is 6c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

## SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis*, except as otherwise indicated. Publications should be ordered by the *publication number*, and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1, Smithsonian contributions to knowledge; 2, Smithsonian miscellaneous collections; 3, Smithsonian reports. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress." The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution.

## Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 63d Congress, 2d session, is to be understood.

# SALES OF GOVERNMENT PUBLICATIONS

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge, the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents, are indicated by a star (\*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

## MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, \$1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

## LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and  $\frac{1}{2}$ c. for each addi-

tional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

#### INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate numbers can not be supplied.

#### HOW TO REMIT

Remittances for the documents marked with a star (\*) should be made to the Superintendent of Documents, Washington, D. C., by postal money order, express order, or New York draft. Currency, if sent, will be at sender's risk.

Postage stamps, foreign money, and defaced or smooth coins are not acceptable.

No charge is made for postage on documents forwarded to points in the United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

The issue of coupons redeemable in public documents by the Superintendent of Documents has been discontinued.

## NOTES OF GENERAL INTEREST

Vol. 2, no. 11, of the Agriculture Department's Weekly news letter to crop correspondents, speaking of the demand that some means be found to restrict the cotton acreage in the coming year, makes this suggestive comment: "Experience, however, has shown that such movements result not in a decrease but in an actual increase. Each man believes that his neighbors will plant less cotton and that the price will consequently go up. He determines, therefore, to take advantage of this by planting all the cotton he can."

In the daily Congressional record for December 1, 1913 (vol. 50, no. 167), notice was conspicuously given by the Joint Committee on Printing as follows: "The last issue of the Congressional record for the first session of the Sixty-third Congress will be published on Saturday, December 6, 1913," etc. The issue of the daily Record thus announced was never made. There was a daily Record on December 6, 1913, but it was no. 6 of the 2d session instead of no. 168 of the 1st session. In the volume notation it was no. 6 of vol. 51, not no. 168 of vol. 50. Collectors who are making up sets of the daily Record will need this information. The final number of vol. 50 (63d Congress, 1st session), is 167, dated December 1, 1913.

The statue of the Baron Frederick von Steuben, who served in the Seven Years War under Frederick the Great and in the American Revolution under Washington, was unveiled at the northwest corner of Lafayette Square, Washington, D. C., Dec. 7, 1910. It had been appropriated for by Congress, Feb. 27, 1903. A competition of artists had been invited in July, 1905, and the design of the sculptor Albert Jaegers of New York had been accepted in May, 1906, and a contract made with him Jan. 10, 1907, for furnishing and erecting the statue. The report of the proceedings of the unveiling, with incidental matter forming a memorial volume, was ordered printed Aug. 21, 1911. The first copies of the completed work were received by the Superintendent of Documents, Oct. 7, 1914. In the document notation it is House document 1455, 62d Congress, 3d session. The compilation, which has been made by Mr. George H. Carter, clerk to the Joint Committee on Printing, is very complete, including an account of the presentation of a replica of the Steuben statue to the German Government and its reception by Emperor William, descriptions and photographs of many Steuben relics, portraits of all the principal participants in the various ceremonials, and other matters of historical interest. The printing has been skillfully done, as becomes a memorial volume of such permanent value. Copies in cloth binding are on sale by the Superintendent of Documents at 75 cents.

The Journal of agricultural research announced in its first monthly number, issued Oct. 1913, that plans were being perfected for the cooperation of investigators in the State agricultural colleges and experiment stations by the contribution of papers to its pages. Apparently these plans have been perfected, for the Oct. 1914, number of the Journal announces the addition to its editorial committee of Raymond Pearl, Maine Agricultural Experiment Station; H. P. Armsby, Pennsylvania State College; and E. M. Freeman, Minnesota Agricultural Experiment Station. It is directed that correspondence relating to articles

from experiment stations should be addressed to Raymond Pearl, Orono, Maine. It is also explicitly stated that the magazine is published by authority of the Secretary of Agriculture with the cooperation of the Association of American Agricultural Colleges and Experiment Stations. The first number having been issued Oct. 1913, and six numbers completing a volume, the current number, Oct. 1914, is no. 1 of vol. 3.

The title "Department bulletins" seems to be definitely fixed for the series of publications proceeding from the Office of the Secretary of Agriculture and superseding the two long-established series of bulletins and circulars issued for many years past from the different bureaus of the Agriculture Department, each bureau having a numbered series of bulletins and a numbered series of circulars, each set of numbers in several instances running into the hundreds. Though over one hundred and fifty bulletins of the new form, proceeding directly from the Secretary's office, have been published, not until October was anything printed that looked toward giving them a collective title. The publication which fixed their status and gave them "a local habitation and a name" is a title-page, contents table, and index for "Department bulletins 1-25." This publication evidently looks to binding the Department bulletins, twenty-five numbers in a volume, as had previously been done with the Farmers' bulletins. As all of the bureaus of the Agriculture Department are contributors to the Department bulletins series, they cover a variety of subjects and the contents of each volume will be considerably diversified. Instead of a series of volumes on one branch of agricultural science, there will be a series in which each volume may touch on several phases of the agricultural life.

The Radio Service, Commerce Department, is an informal division of the Navigation Bureau, consisting of a Washington force of five members and a field force of about twenty-five inspectors and clerks. The annual report of the Radio Service is included in the annual report of the Commissioner of Navigation. The List of radio stations of the United States carries the same heading as other publications of the Radio Service, namely: "Department of Commerce, Bureau of Navigation, Radio Service." The List will be issued annually as of July 1, with quarterly supplements of changes and corrections. The 1914 list became available in October, price 15 cents. No supplements to the 1914 list have yet been issued.

A timely publication has been made by the Radio Service, Navigation Bureau, Commerce Department, under this title: Radio communication laws of the United States and the international radiotelegraphic convention, regulations governing radio operators and the use of radio apparatus on ships and on land.

This Office is advised that it is not likely that Animal Industry Bureau Bulletin 110, which has been in course of publication in parts, will be completed by the publication of the missing parts. The general title of the Bulletin is Biometrical study of egg production in the domestic fowl, and the following parts have been issued: 1. Variation in annual egg production, 1909; 2. Seasonal distribution of egg production, 1911; 3. Variation and correlation in physical characters of the egg, 1914.

Mines Bureau Bulletin 76, United States coals available for export trade, has been printed in three languages, Spanish, Portuguese, and English. Price for the English edition, 5 cents.

The long-expected Regulations governing the uniforms of officers and employees of the United States Public Health Service, Treasury Department, has been published in thirty-five pages of text and twenty-six plates, providing for olive-drab, khaki, and white uniforms. Price, 60 cents. The binding is cloth.

Supplement 12 to Public health reports, Vital statistics, a discussion of what they are and their uses in public health administration, is out in a 2d edition.

Some of the fundamental definitions which it lays down are the following: "Vital statistics are the statistics of life." "Morbidity statistics are the statistics of disease." "Mortality statistics are the statistics of death."

In pursuance of sec. 6 of the river and harbor act of Mar. 4, 1912, a compilation of Laws of the United States relating to improvement of rivers and harbors has been published as House document 1491, 62d Congress, 3d session. Vols. 1 and 2 issued by the Engineer Department have sixteen hundred and thirteen pages of laws, two and four pages of Appendix, respectively, and three hundred and eight pages of Index. This Index of three hundred and eight pages covers the material in vols. 1 and 2, and is the same in both volumes. Vol. 3 which was issued by the Judge Advocate General's Department and entered in the Monthly catalogue for Mar. 1914, has an individual index.

An unusual occurrence was the publication of House document 1179, 63d Congress, 2d session. It is a letter dated Oct. 19, 1914, from the Secretary of Agriculture, requesting that his letter of Oct. 14, 1914, be withdrawn, owing to the fact that a further examination has demonstrated that the statement made in the first letter concerning the finding of a new pest, the Egyptian pink bollworm of cotton, in Northern Florida, was erroneous. The insects reported from the Peninsular State turned out, when examined by experts of the Agriculture Department, to be an immature stage of another bollworm, less injurious.

The evidence taken by the Interstate Commerce Commission in the case of the New York, New Haven, and Hartford Railroad Company, has been published as Senate document 543, 63d Congress, 2d session, in two volumes. Vol. 1 contains the hearings with index, vol. 2, the exhibits with index. Both volumes contain twenty-four hundred and thirteen pages, besides an index in vol. 1 of twenty-three pages, the last page being numbered in error xiii.

Germany, France, Great Britain, Belgium, Holland, Switzerland, Italy, Spain, and the United States have joined in the adoption of an international or metric carat for the weighing of precious stones and precious metals to replace the varying carats of different countries. The weight of the new carat is two hundred milligrams, and in the United States it replaces a carat of about two hundred and five and three-tenths milligrams and carats of varying weights in other countries. Mineral resources of the United States, 1913, part 2, not yet published in full, reports in the separate print of the chapter on Gems and precious stones, page 705, that the new carat has been favorably received by the majority of the jewelers' trade in this country. The difficulties expected from a readjustment of the weights and prices of stones already catalogued have not proved to be great.

Agriculture Department has been receiving numerous letters showing that the writers have misapprehended the purport of Public 95, 63d Congress, the so-called Smith-Lever act, the legal title of which is "To provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1892, and of acts supplementary thereto, and the United States Department of Agriculture." The letter-writers evidently suppose that the millions appropriated by the law can be distributed directly to citizens to aid them in improving home conditions, educating their children, etc. Many will be disappointed to learn that the money goes only to the agricultural and land-grant colleges to enable them to employ qualified men and women as county agents and experts to travel in the farming country and instruct the people in better and more economical methods of farming and housekeeping.

The 4th edition of Miners' circular 8, First-aid instruction for miners, a Mines Bureau publication, is a reprint of the 3d edition, without a change even of the edition number. The Mines Bureau, recognizing the difficulty librarians may find in keeping track of several reissues of one report, has decided to issue hereafter only first editions, reprints, and revised editions, and to give in each case the date of issue.

Farmers' bulletin 628 is Game laws for 1914, a summary of the provisions relating to seasons, export, sale, limits, and licenses. It contains the President's proclamation and the amended regulations as to migratory birds approved Oct. 1, 1914, also the substance of the State and Canadian laws as well as those of the United States. 5 cents.

Part 5 of the Report of the Commissioner of Corporations on the Taxation of corporations is out of press. It deals with the systems of taxation in the Mountain and Pacific States. 25 cents.

A valuable new reference list from the Library of Congress is List of references on water rights and the control of waters. This is a very comprehensive list, including not only publications relating to the United States and the several States but also foreign countries. 15 cents.

The Solicitor of the Agriculture Department has issued a compilation carrying this title: Food and drugs act, June 30, 1906, and amendments of Aug. 23, 1912, and Mar. 3, 1913, with the rules and regulations for the enforcement of the act, food inspection decisions [40-155], selected court decisions, digest of decisions, opinions of the Attorney General, and appendix. The completeness of this compend gives it great value. Its contents have been previously published, but in many small publications, difficult to find and still more difficult to keep track of. Copies in half leather binding are supplied by the Superintendent of Documents at \$1.00.

Treasury decisions for the week of Oct. 29, 1914 (vol. 27, no. 18), contains the full text of an act to increase the internal revenue and for other purposes (Public 217, 63d Congress, known by the popular name "war-tax law"); also, a Revised schedule of articles and occupations subject to tax. The weekly Treasury decisions are supplied to subscribers by the Superintendent of Documents for \$1.75 a year. Single copies are sold at 5 cents.

The Agriculture Department has published an index to vol. 1 of its Weekly news letter to crop correspondents, which was first published Aug. 13, 1913. Those who have received it (and it is free) and have not saved the weekly numbers have thrown away a valuable and entertaining miscellany of farm knowledge, now made readily accessible by the new index.

The Census Bureau has not, at the time of this writing, announced the issue of a Statistical atlas for the 13th census (1910) but one is to be issued, and the work on it, even to the printing, is well advanced. In fact, the presswork is completed, and the presswork, when many colored diagrams are used, as in previous statistical atlases, is the main part of the work. The Census Bureau expects deliveries of the atlases within two or three weeks.

The War Department has issued another edition of Cavalry service regulations, United States Army (experimental). This is an important manual, but it is not Cavalry drill regulations, as many seem to suppose. A new edition of the Cavalry drill is in preparation, but it will be sometime before it will be ready. The Cavalry service regulations (experimental) has been issued to the cavalry officers and "will govern in the training and leading of cavalry," and in the month of June, 1915, each officer of the cavalry service must submit a report embodying his opinions and recommendations as to these regulations. The new edition of the Cavalry service regulations, which for the time being is

the Army standard, is for sale in fabrikoid binding, by the Superintendent of Documents, at 50 cents.

Circular of information concerning census publications is a much inquired for and much needed publication just out of press and sent on application by the Census Bureau.

#### FIRST FRUITS OF THE NEW BANK SYSTEM

The Federal Reserve Board, a body which is destined to play a large part in the business and financial history of this country, has begun the issue of a series of circulars of an important and instructive character. Several numbers have thus far been published. No. 1 was issued by the Reserve Bank Organization Committee under date of Feb. 14, 1914. Circular 2 was not published. No. 3 is the first issue from the Federal Reserve Board. It is dated Aug. 25, 1914, and is accompanied by a blank form to be filled in with information as to the condition and resources of the bank to which it is sent. There are two prints of Circular 3, one for the reserve city banks and the other for the nonreserve city banks.

The Superintendent of Documents is advised that Circulars 4 and 5 "were eliminated." Just what the quoted words mean when applied to a public document is not altogether clear, but the probability is that they were "printed, but not published." Circulars 6 and 6a were printed confidentially, for the use of the Board, and have not yet been released.

Circular 7, dated Oct. 14, 1914, presents for consideration by the boards of directors drafts of a system of accounting for the banks. 47 pages quarto.

Circular 8, dated Oct. 17, 1914, presents for consideration the outline of a tentative organization for the banks in certain essential aspects of their business. 45 pages quarto.

Nos. 9 and 9<sup>a</sup> have been printed but are considered confidential.

Circular 10, dated Oct. 28, has for title, Transfer of reserves to Federal reserve banks.

In addition to the set of circulars, there is Regulation 1. Procedure in appeals from decision of the Reserve Bank Organization Committee. Also there is a pamphlet containing the reports of the committees belonging to the Convention of officers and directors of Federal reserve banks held at Washington, D. C., Oct. 20 and 21, 1914.

#### FURTHER NEUTRALITY RULES

Neutrality and trade in contraband, a circular issued by the State Department, has been published as Senate document 604, 63d Congress, 2d session.

It declares that "generally speaking, a citizen of the United States can sell to a belligerent Government or its agent any article which he pleases." For the Government itself to sell articles contraband of war to a belligerent would be an unneutral act.

There is a wide difference between the act of the Government and the act of an individual.

#### AN UNLOOKED-FOR USE

The act creating the United States Geological Survey in 1882 provided that it should make a geological map of the United States. The Survey was willing, but found that the most necessary preliminary, a base map, did not exist. Consequently the Survey at once set about making a base map, and has been making

it ever since from actual surveys. Thousands of "topographic sheets," each one a part of the base map, have been published.

These sheets have been offered for sale as they were issued, and great numbers of them have been sold. This sale has been much stimulated in recent years by a cause that the authorities of the Survey could not possibly have foreseen. This cause is the automobile, which did not become a practical apparatus until a score of years after the birth of the Survey. Automobiles cause road trips. Road trips require knowledge of roads. Nowhere else can such knowledge be acquired so readily and so accurately as by the use of the topographic sheets. But people who use the sheets only to trace the roads have no use for such a term as "topographic." Consequently the more popular name "road maps" has come into use, and under this name a large demand for the sheets has sprung up and is constantly growing.

It would not be surprising to learn any day that the largest calls for the topographic base-map sheets are made under the name of road maps, and that this demand has doubled the use of this publication of the Geological Survey, which has become even better known as a popular help for joy riding than it was as a branch of scientific map making.

#### THIS IS IMPORTANT

American manufacturers who have an idea of "capturing the South American market" should read with thoughtful care "Statements on the Latin American trade situation made by representatives of Latin American countries at a conference held before the Secretary of State and the Secretary of Commerce, Washington, D. C., Thursday, September 10, 1914."

The Ministers of Bolivia, Uruguay, Peru, and Cuba made very plain and forcible talks about the necessity of complying with South American customs if we hope to acquire South American trade. One of them said: "It is worse than useless to send the American type of drummer to South America." Another said: "The United States must send down men to make friends with our people and overcome the existing distrust." And again: "We must have the goods we need and not the goods the American manufacturer thinks we ought to have." There is no doubt the market is there and that the death-struggle in which England and Germany are engaged has lost to them that control of it which they have been dividing between them for years past. It is open to the United States, but it can not be taken by force. One of the diplomats said: "It has become an aphorism all over South America that Americans do business only on their own terms and in their own way." In the present crisis it seems that more complaisance, more consideration for the ideas and feelings of the customer, may be found more productive than the methods hitherto in use, which it seems plain have repelled instead of attracting South American trade.

#### LIGHT FOR THE BLIND

An interesting publication is the List of books in embossed type in the reading room for the blind which the Library of Congress has just printed. These are of course the books printed with raised letters which the blind read with their fingers. Both the blind and those who choose their books are to be congratulated on the excellence of the selections shown in this list. The sightless are perhaps to be also congratulated on their escape from much printed trash which they could not well escape if they had their sight.

It is a little surprising to note how many kinds of raised type are supplied to blind readers. Having learned to read in one kind of finger-type only, the

blind man who has another kind offered to him is little better off than a one-language American before a page of Greek text.

#### DONIPHAN'S EXPEDITION.

The Senate, Oct. 21st, adopted a resolution to reprint as a Senate document an account of Col. Doniphan's conquest of New Mexico during the War with Mexico, 1846-48. The pamphlet was offered for reprint by Senator Stone of Missouri last May, and the author's name is given as John T. Hughes, A. B., a member of the 1st Missouri Cavalry, which was Doniphan's command. The original illustrations are to be reproduced, which can be done much more easily now by photography than was possible half a century and more ago when wood-cutting was the only method of illustration open to the every-day pamphleteer.

Mr. Hughes's pamphlet was originally printed and copyrighted in Cincinnati in 1847. It should be a brilliant work, for it chronicles an exceedingly brilliant campaign. Doniphan maintained himself for many months in Mexican territory without communication with his own country, and when he cut his way out after more than a thousand miles of weary marching and successful fighting he found that the war was over and that he and his compatriots had conquered an empire.

The forthcoming reprint of the Hughes pamphlet is not the only report of Doniphan's expedition to be found in the Government publications of the United States. There is one back in the 30th Congress bearing the following title-page: "30th Congress, 1st session, Senate miscellaneous, no. 23. Memoir of a tour to northern Mexico, connected with Col. Doniphan's expedition in 1846 and 1847. By A. Wislizenus, M. D. With a scientific appendix and three maps. January 13, 1848, ordered that 5,000 copies be printed for the use of the Senate, and 200 additional for Dr. Wislizenus. Washington, Tippin & Streeper, printers, 1848."

The two reports are of about equal length, (Hughes's 144 pages, Wislizenus's 141 pages), but they differ widely in character. The Doctor, who was Doniphan's surgeon, was an enthusiastic naturalist, and his report is in large part devoted to botany, geology, and weather tables, and only in small part to fighting, while Hughes's report is pretty much the reverse of this.

#### A 500-VOLUME SET

At the moment of writing eight parts (books) have been issued of the permanent bound edition of the Congressional record, vol. 51, containing the proceedings of the 63d Congress, 2d session. The total number of volumes of Congressional proceedings from the beginning of the Government is now 489, and when all the parts of vol. 51 and its index have been completed the total will be 500 huge volumes of the work of the American Congress. These have appeared in several series, thus: *Annals of the Congress*, 1789-1824, 42 vols.; *Register of debates*, 1825-37, 29 vols.; *Congressional globe*, 1832-73, 100 vols.; *Congressional record*, 1873-1914 (providing there are no more than 18 parts in vol. 51), 320 vols. Total, 500 vols.

#### CLASSIFICATION OF I. C. C. PUBLICATIONS

In the next Monthly catalogue we hope to announce and describe a new scheme of classification of the publications of the Interstate Commerce Commission. The extreme development of the publishing side of the Commission's work has long ago outgrown the plan of classification originally adopted by the Office of the Superintendent of Documents, but the pressure of other duties has until now prevented the construction and application of a new plan.

The scheme of classification now adopted is so elastic that it can not be outgrown and so simple and logical that it will greatly facilitate the handling of the I. C. C. set. The new classification will be printed and copies supplied to all owners of the Checklist of public documents, in which the existing outworn classification is printed at pages 558-587.

#### AN OVERSIGHT IN THE MONTHLY INDEX

Attention is here called to an error in the Index to the Monthly catalogue, July, 1913-June, 1914. It was not discovered until the index had been mailed, when a notice of the correction was sent out with the September issue of the Monthly catalogue as follows:—

Strike out the 20th line of the 1st column on page lxxiv, "Navigation Bureau, Navy Dept----88," and substitute therefor in the margin "Navy:"

#### CORRECTION FOR AUG. 1914, MONTHLY CATALOGUE

For "[15th]" in 1st line of entry under Vicksburg National Military Park Commission on page 126, read "[16th]."

## CROP ESTIMATES BUREAU

### Topographic sheets

**NOTE.**—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The usual size, exclusive of the margin, is about 17.5 inches in height by 11.5 to 16 inches in width, the latter varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

Nearly two-fifths of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 10c. each; but in lots of 50 or more copies, whether of the same sheet or of different sheets, the price is 6c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

## TOPOGRAPHY DIVISION

NOTE.—Since February, 1908, the Topography Division has been preparing rural-delivery maps of counties in which rural delivery is completely established. They are published in two forms, one giving simply the rural free delivery routes, starting from a single given post office, sold at 5 cents each; the other, the rural free delivery routes in an entire county, sold at 20 cents each. A uniform scale of 1 inch to 1 mile is used. Editions are not issued, but sun-print copies are produced in response to special calls addressed to the Finance Division, Office of Third Assistant Postmaster General. These maps should not be confused with the post route maps for which see Monthly catalogue for January, 1914, page 367.

## SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis*, except as otherwise indicated. Publications should be ordered by the *publication number*, and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1. Smithsonian contributions to knowledge; 2. Smithsonian miscellaneous collections; 3. Smithsonian reports. No sets of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress." The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution.

\* Document for sale by Superintendent of Documents.

† Distribution by office issuing document, free if unaccompanied by a price.

‡ Document not obtainable.

## Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 63d Congress, 2d session, is to be understood.

## SALES OF GOVERNMENT PUBLICATIONS

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge, the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents are indicated by a star (\*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (§) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

### MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, \$1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

### LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and  $\frac{1}{10}$ c.

for each additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

#### INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate numbers can not be supplied.

#### HOW TO REMIT

Remittances for the documents marked with a star (\*) should be made to the Superintendent of Documents, Washington, D. C., by postal money order, express order, or New York draft. Currency, if sent, will be at sender's risk.

Postage stamps, foreign money, and defaced or smooth coins are not acceptable.

No charge is made for postage on documents forwarded to points in the United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

The issue of coupons redeemable in public documents by the Superintendent of Documents has been discontinued.

## NOTES OF GENERAL INTEREST

There is a new print of Field service regulations. United States Army, corrected to July 1, 1914, and sold at 60 cents, in fabrikoid binding.

Reprint 222 from Public health reports is Cooperative public health administration, an experiment in small communities. It describes a successful experiment in uniting a group of six town communities in supporting a cooperative health office corresponding in efficiency to those in large cities. It is hoped that this successful experiment may lead to many others, by which the standard of sanitation may be raised in country places to that now attained in most of the larger cities. According to oldtime beliefs, the country should be more healthful than the cities. No doubt this was once the case, but by the establishment of health offices in the cities and the lack of such offices in the country the scale has been turned, and the cities appear now to be more healthful than the country. By such cooperation as this reprint describes, the scale may perhaps be turned again.

A correspondent in New York City, writing on Nov. 22, 1914, said this among other interesting things: "I do not want something for nothing, but simply a list of the books the Government publishes and the prices thereof. I, as well as my friends, have difficulty in finding out just what the Government does publish. Some send to Senators and Congressmen, but they have only so many to distribute, a long correspondence ensues, and that is generally the end of it. If one could only find out just what the Government published, and the price, he could attend to it himself." The gentleman's ideas are eminently sound, and the Documents Office was glad to be able to supply the information to enable him to carry them out.

By virtue of a Senate resolution adopted Feb. 28, 1913, a new edition of Gilfry's Precedents, decisions on points of order, with phraseology, in the United States Senate, has been printed, bringing the record up to the close of the 62d Congress, Mar. 4, 1913.

The Comptroller of the Currency has issued an important circular (Form 2207) entitled Duties and liabilities of directors of national banks and member banks of the Federal reserve system.

Civil service examinations are soon to be held in several hundred places to create eligible lists for bookkeepers, clerks, and messengers for the Federal Reserve Board.

The Report of the proceedings of the annual convention of National Association of Railway Commissioners, which was for many years printed by the Interstate Commerce Commission and thus made a public document of the United States and consequently sold by the Superintendent of Documents, was last year printed by the American Law Reporting Company of 115 Broadway, New York, and thus deprived of its status as a document. The same will be the case this year. The publisher will also be the seller. The price will be \$1.00.

The Public Health Service is issuing a new numbered series of publications, called "Health news," not printed in the strict use of the term, but reproduced

by one of the many multiplying processes of the day which are so much like printing that it is difficult to draw a hard-and-fast line between them. The primary object of the new series is to try to induce the newspapers to take a little more interest in health matters by supplying to them ready-made "copy" of guaranteed authenticity. Twenty-two numbers have been sent out, the date of no. 1 being Sept. 19 and of no. 22, Dec. 4. It will be seen by the following list of titles that the material is practical and timely: The existing need for competent health officers and how they may be obtained; Punch holes in the bottom of tin cans and prevent malaria; Hygiene of rural schools; Cause and prevention of pellagra; Drug intoxication; Prevention of pellagra; Friedmann tuberculosis cure; Possibility of eliminating the drug-store saloon; Prevention of scarlet fever; Eradication of yellow fever and malarial fever in Iquitos, Peru; Sale and use of poisons; Sale and use of cocaine and narcotics; Pure water to be furnished on trains and boats; Prevention of disease among workmen; Poisons and habit-forming drugs; Extermination of ground squirrels in California; An example of sanitary vigilance; Treatment of a vessel infected with plague today, as compared with the treatment of infected vessels in the sixteenth century; Entertainment of persons detained at U. S. quarantine stations; Value of mental hygiene in the development of backward children; A progressive township; Sanitation of rural schools.

#### FEDERAL RESERVE ACT INDEXED

The Federal Reserve Board is having made an official index to the Federal reserve act. It will be very complete and minute, filling more than 400 pages. It will be bound in cloth and sold by the Superintendent of Documents at 75 cents.

The Board is also issuing a series of numbered Regulations and some other publications, but these are furnished free on application to the Board direct.

#### A LONG ESTABLISHED GOVERNMENT SERIES SUPERSEDED

Beginning with the 2d convention in 1885, the Proceedings of the annual conventions of the Association of Official Agricultural Chemists have been continuously published as bulletins of the Chemistry Bureau, Agriculture Department, up to and including the 29th convention, held in Washington, Sept. 16-18, 1912. Then the Agriculture Department decided to discontinue printing them. The numbers of the Chemistry Bureau bulletins in which the Proceedings are printed are: 7, 12, 16, 19, 24, 28, 31, 35, 38, 43, 47, 49, 51, 56, 57, 62, 67, 73, 81, 90, 99, 105, 116, 122, 132, 137, 152, 162.

Thus left to its own resources, the Association has resolved to establish a quarterly journal or magazine in which it may, if it chooses, print the proceedings of its own annual conventions. It is understood to have been decided that the hitherto unprinted proceedings of the convention of 1913 shall see the light in the new magazine, but when and where the new magazine shall see the light has not yet been decided.

Interested persons may make inquiry of Dr. Carl Alsberg, Chief of the Chemistry Bureau, Agriculture Department, who is secretary and treasurer of the Association of American Official Agricultural Chemists.

The 1914 convention of the Association was held in Washington during the present month and was the most successful of its meetings, 300 members having been present. Dr. Harvey Washington Wiley, who was for many years secretary of the Association, is now its honorary president.

## "CAPITULATIONS" OF THE TURKISH EMPIRE

The item in the foreign news a short time ago to the effect that the Turkish Government had abrogated all its "capitulations" without asking the consent of other Powers was rather a puzzle to all who did not know that "capitulation" is the technical designation for the peculiar form of treaty that other nations have been from time immemorial making with Turkey.

Before concluding that the puzzle has no answer, ask public documents. They can not answer all questions, but they can answer this one. Apr. 7, 1881, President Garfield sent to Congress Part 1 of a Report on the capitulations of the Ottoman Empire, which had been made by Edward A. Van Dyck, American consular clerk. This Report was printed as Senate ex. doc. 3 of the 47th Congress, special session, Mar. 4-May 20, 1881. It gives a historical sketch of the whole series of capitulations and the text of many.

Feb. 2, 1882, President Arthur sent to Congress Part 2 of Van Dyck's report, and it was printed as Senate ex. doc. 87 of the 47th Congress, 1st session. The report thus completed is considered a valuable treatise on a little-known subject.

Parts 1 and 2 are bound up with other reports in two large leather-bound volumes known in the Documents Office as Serials 1943 and 1989. The price of the first named is \$1.75, and of the second \$1.90.

## A RECORD OF LITERARY AND HISTORIC INTEREST

The Copyright Office, Library of Congress, has well under way a work of magnitude and of great dramatic interest.

It is a title list of all dramas copyrighted in the United States from 1870 to the present time. There are about 53,000 of these dramas, of which it is estimated that less than one in fifty has been produced on the stage. It will be seen, therefore, that the new list will resurrect from the tombs of the Capulets many thousands of long-buried compositions, some of which may have deserved a better fate, and some few of which may even yet see the footlights through the benevolent agency of the new list.

It is to be a very comprehensive list, showing the names of the authors, translators, adapters, copyright proprietors, and even the names of the original authors in the case of adaptations.

This new guide to the dramatic literature of America will certainly exceed one volume in bulk and may require three volumes for its proper presentation. Its formal title-page has not yet been drafted and no part of it has yet been put in type, but the work of compilation has long been under way and the compilers have begun to form anticipatory conceptions of the extent and physical semblance of the completed work. It must, however, be many months before these conceptions can be visualized, for such compilations can not safely be "rushed."

## COMPARATIVE METHODS OF TAXATION

Taxation and revenue systems of State and local governments was issued in October by the Census Bureau. The letter of transmittal states that while this has been prepared in connection with the decennial investigation of wealth, debt, and taxation, it is published in advance of the complete report that the information may sooner reach the public. It presents a digest of the laws relating to taxation in the several States. The period covered includes the year 1912, and for those States whose legislatures convened in 1913 the revenue legislation of that year is also included. A vast amount of statistical informa-

tion of permanent value is thus presented in comparatively small compass. 50 cents.

#### PASSING OF THE LARGEST PUBLIC DOCUMENT SERIES

The Specifications and drawings of patents undoubtedly have the distinction of being the largest series yet issued by the Government. Its publication began May, 1871, in weekly volumes; August, 1872, the form was changed to a monthly volume; July, 1885, the monthly issue was split into two parts (volumes), and January, 1903, into three parts. From that time thirty-six volumes a year have been issued, and many of the volumes have been very large.

The Sundry civil act of Aug. 24, 1912, repealed the authority for the publication of the Specifications and drawings in any collected form. The series will therefore end with the volume (in three parts) for June, 1912. Owing to their great size perhaps, or to some other reason not made public, the bound volumes have always been in arrears and are so now. The latest volumes received at the Documents Office are the three for June, 1911, and no more are expected. Some volumes have been sent out in unbound signatures.

A hasty count, which there is not time to verify, seems to show that when the set has been got together on the shelves it will count up 974 books, mostly of mammoth size, filling about 350 feet of shelf-room.

The Specifications and drawings of patents are still printed in the pamphlet or slip form and sold by the Patent Office at 5 cents each. Only the bound volumes have been discontinued.

#### BIRD RESERVES AND NATIONAL MONUMENTS

It appears by the 1914 Annual report of the Commissioner of the General Land Office, issued during the present month, that there are now sixty-seven national bird reserves and thirty national monuments, three of the former and two of the latter having been created by Executive proclamation since the issue of the 1913 Annual report of the Land Commissioner.

The new bird reserves are: 1. Anaho Island, in Pyramid Lake, Nevada, the home of the white pelican; 2. Smith Island, in the Strait of Juan de Fuca, Washington State, the roost of wild ducks and geese and of many migratory shore birds, which have been slain in thousands by market hunters; 3. Black-beard Island, off the coast of Georgia, evidently named for one of the most eminent pirates of the 18th century, Edwin Teach by real name, described in the *Encyclopedia Britannica* as "a grotesque brute," who met his natural death—that of violence—at the hands of Lieut. Milrain in 1718.

The two new national monuments are the Cabrillo, about half an acre in extent, on Point Loma, Cal., where citizens of the locality will place a historic statue to the memory of Juan Rodriguez Cabrillo, who is said to have discovered California in 1542, and the Papago Saguaro, about eight miles northeasterly from the city of Phoenix, Ariz. This latter monument is described as a tract of 2,050 acres of nonirrigable desert, of no value for agriculture, and yet yielding a desert flora of giant cacti, yuccas, and palms so magnificent and of such exceptional scientific interest as to be thought worthy of preservation as a national monument.

#### A NOTABLE INDEX

Publication 185 of the series of publications of the Carnegie Institution of Washington, now in course of publication, is a work of great interest to those

librarians who have or expect to have important collections of United States public documents. It is: Index to United States documents relating to foreign affairs, 1828-1861. In three parts. Part 1-A to H. By Adelaide R. Hasse, Chief of Public Documents Division, New York Public Library.

The inclusive dates, 1828-1861, are fixed by the close of the period covered by Gales and Seaton's State papers, class foreign relations, 6 vols., 1789-1828, and the beginning of the State Department's annual series of Foreign relations, 1861. These two series, before 1828 and after 1861, are indexed after a fashion, but the intermediate period, 1828-1861, is now so much more thoroughly indexed that a demand is likely to arise for a reindexing of the earlier and later periods.

Part 1, which covers a third of the alphabet, fills 793 double-column quarto pages, in 8-point and 6-point type, indicating more than 2,000 such pages for the complete index.

### Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The usual size, exclusive of the margin, is about 17.5 inches in height by 11.5 to 16 inches in width, the latter varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

Nearly two-fifths of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 10c. each; but in lots of 50 or more copies, whether of the same sheet or of different sheets, the price is 6c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

## SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis*, except as otherwise indicated. Publications should be ordered by the publication number, and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1, Smithsonian contributions to knowledge; 2, Smithsonian miscellaneous collections; 3, Smithsonian reports. No sets of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress." The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution.

## Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 63d Congress, 3d session, is to be understood.

## SALES OF GOVERNMENT PUBLICATIONS

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge, the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents are indicated by a star (\*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

### MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, \$1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

### LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not

included) on the cards. The price of the cards is 2c. for the first card and  $\frac{1}{10}$ c. for each additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

#### INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate numbers can not be supplied.

#### HOW TO REMIT

Remittances for the documents marked with a star (\*) should be made to the Superintendent of Documents, Washington, D. C., by postal money order, express order, or New York draft. Currency, if sent, will be at sender's risk.

Postage stamps, foreign money, and defaced or smooth coins are not acceptable.

No charge is made for postage on documents forwarded to points in the United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

The issue of coupons redeemable in public documents by the Superintendent of Documents has been discontinued.

## NOTES OF GENERAL INTEREST

The publishing work of the Agriculture Department continues to grow amazingly. During the fiscal year 1914 the number of new publications was 1,152, and the total number of copies printed of these newcomers was 26,691,692. Of reprints of publications of former years the number was 11,494,700, making a grand total of 38,186,392, as the output of publications for the year. Of these the Superintendent of Documents sold 231,821.

Under date of Nov. 12, the United States State Department published early in December a List of articles embargoed by neutral European countries, compiled from the latest available information but liable to be changed as each country modifies its rules from time to time. The list is a long one and contains many commodities not usually supposed to have any relation to military or naval operations.

Education Bureau Bulletin 12, series of 1914, Rural schoolhouses and grounds, shows those adjuncts of the educational life as they are and as they ought to be. Sometimes the difference is great.

The annual report of the Attorney General of the United States for the year 1914, 45 cents in cloth, gives, in addition to the work of the various bureaus of the Justice Department, information relative to the enforcement of the Federal antitrust law, covering cases finally determined and cases pending; also cases under the interstate commerce law.

The annual report of the Secretary of the Treasury on the state of the finances for the fiscal year ended June 30, 1914, is sold by the Office of the Superintendent of Documents at 20 cents per copy.

The last annual report of the Commissioner of Corporations has been published. It contains an interesting discussion of the functions of the Bureau of Corporations and of the Federal Trade Commission.

The first annual report of the Commission on Industrial Relations has been issued, price 10 cents a copy.

An annual report which is always in great demand is that of the Chief Inspector of Locomotive Boilers to the Interstate Commerce Commission. The third report has been published. It contains many illustrations of locomotive boiler explosions and defects, and is sold for 15 cents a copy.

The annual report of the Isthmian Canal Commission and the Panama Canal for the fiscal year ended June 30, 1914, is published in two parts; the first a volume of text profusely illustrated, showing the actual work of construction, and the second a portfolio of plates and maps, sold together at \$1.25.

The text of the 26th annual report on the Statistics of railways in the United States for the year ended June 30, 1913, has been published in a large quarto pamphlet, sold by the Superintendent of Documents for 10 cents. This is the standard authority on its subject.

A few months ago the country was engaged in a discussion of the merits of the "Friedmann treatment" for tuberculosis. The Hygienic Laboratory has published the report of the board appointed for the investigation of the merits of this treatment. Price, 10 cents.

An important publication in connection with the present agitation relative to our military resources is the Manual for noncommissioned officers and privates of infantry of the organized militia and volunteers of the United States, 1914 edition, 45 cents, fabrikoid. This publication is published by the authority of the Secretary of War. It covers instructions to officers of the organized militia, matters of discipline, drill, etc., and one of the most important parts of the work is the chapter entitled "Personal hygiene," embracing care of the feet, first aid rules, etc.

The text of the telegram sent by the Secretary of State to the American Ambassador at London, relative to the seizures and detentions of American cargoes destined to neutral European ports, has been printed by the State Department, and copies are for sale by the Office of the Superintendent of Documents at 5 cents each.

#### AGRICULTURAL "SPECIALS"

The Agriculture Department is issuing, under the general designation "special," a series of "boiled down" or condensed publications of a highly practical and efficient sort. Each one is only four pages long, but in that brief space it tells every time a complete story on an important subject. Each of the "specials" thus far issued disposes of a branch of farm enterprise in double-quick time and so clearly that nobody can possibly fail to understand it. The subjects thus far handled, with the dates of the publications, are as follows:

Nov. 21, 1914.—Winter oats in the cotton belt; Winter wheat in the cotton belt.

Nov. 25, 1914.—How southern farmers may get a start in pig raising; Horse and mule raising in the South.

Nov. 30, 1914.—Suggestions on poultry raising for southern farmers; Producing sheep on southern farms.

Dec. 2, 1914.—Rye in the cotton belt.

Dec. 15, 1914.—Hairy vetch for the cotton belt; Rape as a forage crop in the cotton belt.

Dec. 16, 1914.—Do you keep a cow?

Dec. 18, 1914.—Advantages of dairying in the South; Feeding the farm cow in the South.

Dec. 19, 1914.—The feeding and care of dairy calves; Marketing butter and cream in the South.

Dec. 23, 1914.—Permanent pastures for the cotton belt; Sorghum for forage in the cotton belt.

Evidently these "specials" have a special purpose in view. What it is is explained in a footnote printed on the first page of each one of the series. It runs thus: "Intended for farmers in the cotton belt, who desire to diversify their farming because of the economic crisis which adversely affects the cotton crop at this time."

#### CORRECTION FOR NOV. 1914, MONTHLY CATALOGUE

Page 235 of the Nov. 1914, Monthly catalogue, United States public documents, contained a note regarding the Report of the proceedings of the annual convention of National Association of Railway Commissioners, which is correct in all regards except as to the price of the publication. The 1913 proceedings are sold at \$1.00, the 1914 at \$2.50.

## MARKETS AND RURAL ORGANIZATION OFFICE

NOTE.—The Markets Office was organized May 16, 1913, as a branch of the Secretary's Office, under authority of a paragraph in the miscellaneous section of the agricultural appropriation act approved Mar. 4, 1913.

In cooperation with the General Education Board of the Rockefeller Foundation, the Rural Organization Service of the Agriculture Department was organized in the fall of 1913. The work of this Service consisted of investigations in regard to the organization of agricultural communities upon a cooperative basis for the improvement of rural credit, educational, social, and hygienic conditions. The Service was financed by the General Education Board from the time of its organization to June 30, 1914. On July 1, 1914, the work of the Rural Organization Service was entirely taken over by the Agriculture Department under the authority contained in a paragraph among the miscellaneous appropriations of the agricultural appropriation act approved June 30, 1914.

Later the work of the Markets Office and of the Rural Organization Service was combined by the Secretary of Agriculture in one office, which was designated by him as the "Office of Markets and Rural Organization." The office at that time was established on the same footing as other bureaus and independent offices of the Department. It consists of "Marketing and Distribution Investigations" and "Rural Organization Investigations," both under the direction of the same administrative officer.

## GEOLOGICAL SURVEY

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers; and maps, Monographs, and folios of the Geologic atlas (issued in Library and Field editions) and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to \$11.00 each. A wholesale rate has been established for topographic and geologic folios (either Library or Field editions), whenever the sum transmitted solely for folios at the wholesale price amounts to at least \$5.10; that is, a discount of 40 per cent will be given whenever 34 or more folios that sell singly for 25c., or their equivalent in higher priced folios, are ordered at one time. Address the Director of the Geological Survey, Washington. For topographic sheets see below.

## Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The usual size, exclusive of the margin, is about 17.5 inches in height by 11.5 to 16 inches in width, the latter varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

Nearly two-fifths of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 10c. each; but in lots of 50 or more copies, whether of the same sheet or of different sheets, the price is 6c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

*Alaska.* Reconnaissance map of Chitina quadrangle, Copper River region, Alaska, lat.  $60^{\circ}$ – $62^{\circ}$ , long.  $142^{\circ}$ – $146^{\circ}$  20'. Scale 1:250,000, contour interval 200 ft. [Washington, Geological Survey] 1914.  $36.1 \times 38.8$  in. † 50c.

## SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis*, except as otherwise indicated. Publications should be ordered by the *publication number*, and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1, Smithsonian contributions to knowledge; 2, Smithsonian miscellaneous collections; 3, Smithsonian reports. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress."

The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution, but as they are usually regarded as public documents and have free transmission by mail they are listed in the Monthly catalogue.

## NORTHERN AND NORTHWESTERN LAKES SURVEY

NOTE.—Lake Survey charts may be obtained from U. S. Lake Survey Office, Detroit, Mich., or from U. S. Engineer Office, Buffalo, N. Y. Payments must be made before charts are sent, and if made by mail must be by postal or express money order payable to the order of U. S. Lake Survey Office if ordered from Detroit, or to the order of U. S. Engineer Office if ordered from Buffalo. These charts may also be obtained, for cash only, at U. S. Canal Office at Sault Ste. Marie, Mich. They will be sent by express, the express charges to be paid by the purchaser on receipt of the charts, or free by mail at the purchaser's risk. Purchasers should indicate, when ordering the charts, whether they wish them sent by express or mail. The latter will be used when no choice is indicated.

The bulletins and supplements of the Lake Survey may be obtained free upon application at U. S. Lake Survey Office, Detroit, Mich., and at the engineer offices in Duluth, Milwaukee, Chicago, Grand Rapids, Cleveland, Buffalo, and Oswego.

\* Document for sale by Superintendent of Documents.

† Distribution by office issuing document, free if unaccompanied by a price.

‡ Document not obtainable.

## Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 63d Congress, 3d session, is to be understood.

# SALES OF GOVERNMENT PUBLICATIONS

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge, the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents are indicated by a star (\*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

## MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, \$1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

## LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and  $\frac{1}{2}$ c. for each additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

## INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate numbers can not be supplied.

## HOW TO REMIT

Remittances for the documents marked with a star (\*) should be made to the **Superintendent of Documents, Washington, D. C.**, by coupons, postal money order, express order, or New York draft. Currency may be sent at sender's risk.

*Postage stamps, foreign money, defaced or smooth coins, positively will not be accepted.*

The coupon system has been reestablished. For the convenience of the general public, coupons that are good until used in exchange for Government publications sold by the Superintendent of Documents may be purchased from his Office in sets of 20 for \$1.00. Address order to Superintendent of Documents, Government Printing Office.

No charge is made for postage on documents forwarded to points in United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

## NOTES OF GENERAL INTEREST

We are gratified to announce the reestablishment of the coupon system which was discontinued for awhile. This system is of great convenience to remitters, and full particulars are given on the opposite page under the heading "How to remit."

Additional evidence that the spirit of cooperation is growing in the Departments, notably the Departments of Commerce and Agriculture, is furnished by the List of publications of the Department of Commerce available for distribution, 11th edition, Jan. 1, 1915, recently issued by the Departmental Division of Publications, and is of intrinsic interest to the Office of Superintendent of Documents, giving prices in all instances where prices have been fixed, and stating in a prefatory note that the publications may be obtained by purchase from the Superintendent of Documents.

Vol. 1, of the annual report of the Comptroller of the Currency, to the 3d session of the 63d Congress, 1914, furnishes material of great current interest, the most important being perhaps the information concerning the inauguration of the new Federal Reserve System, and other vital elements in the make-up of the System. It contains the usual statistics covering the national banks, and an appendix will follow as vol. 2. Vol. 1 is 25 cents in cloth.

A timely bibliography from the Library of Congress is at hand entitled, List of references on Europe and international politics in relation to the present issue, its purpose being, as stated in the prefatory note, "to indicate material upon the causes and events which led up to the present European war." The documentary material includes the different papers issued by the countries directly involved in war. Price, paper, 15 cents.

The Children's Bureau has issued no. 2 of Care of children series, under the caption Infant care. This valuable little book covers birth registration, living conditions, etc., embracing treatment of disease, contagious and otherwise, use of toys, with practical recipes for the preparation of food. Price, paper, 15 cents.

Bulletin of the United States Bureau of Labor Statistics, whole no. 160, is no. 4 of the series captioned Women in industry, bearing the full title Hours, earnings, and conditions of labor of women in Indiana mercantile establishments and garment factories. Price, paper, 20 cents.

The Glacier National Park—a popular guide to its geology and scenery, by Marius R. Campbell, is a valuable addition to the literature of American sight-seeing. It is published by the United States Geological Survey as Bulletin 600, and covers the general physical and topographical features of the Park. It is finely illustrated with detached map. Price, paper, 30 cents.

The United States Bureau of Education is devoting considerable space to domestic science, and we have received Bulletin 36, 1914, Education for the home, by Benj. R. Andrews, Part 1, covering Introductory survey and equipment for household arts. Mr. Andrews gives an interesting history of the growth of household art and its literature, with a practical treatise on teaching and equipment. Price, paper, 10 cents.

Farmers' bulletins 631, 632, and 633, Growing peaches—sites, propagation, planting, tillage, and maintenance of soil fertility, Growing peaches—pruning, renewal of tops, thinning, interplanted crops, and special practices, and Growing peaches—varieties and classification, are new publications. All three are by H. P. Gould, pomologist, and give information relative to the varieties suitable for certain conditions, climate, soils, etc., in addition to horticultural practices. Price, paper, 5 cents each.

The Bureau of Standards has added to its current studies Technologic paper 43, Hydration of portland cement. Price, paper, 20 cents.

The Department of Agriculture has issued Department Bulletin 162, Horticultural experiments at the San Antonio field stations, southern Texas. It is principally devoted to fruit culture in that section, and is illustrated. Price, paper, 5 cents.

A Preliminary abstract of statistics of common carriers, year ended June 30, 1914, is now in stock. Price, paper, 25 cents. This is the current number of the series started in 1911, and all persons who desire to keep their sets intact should order at once, as in previous years there has been some shortage. It is the most comprehensive work of its nature published, covering all classes of common carriers, and embracing an introductory statement—list of carriers by steam railway included in this abstract—preliminary abstract of reports of the principal operating steam railway companies for 1914—preliminary statement of income account and profit and loss account of principal express companies for years 1913 and 1914—preliminary abstract of report of Pullman Company for 1914.

For years the great difficulty attending education in country districts was the problem of getting the children to and from the schoolhouse. Now all this is changed. The new system is set forth in Bureau of Education Bulletin 30, 1914—Consolidation of rural schools and transportation of pupils at public expense, by A. C. Monahan. Price, paper, 25 cents.

Another insight into modern educational methods is Bureau of Education Bulletin 46, 1914—School savings banks, by Mrs. Sara Louisa Oberholtzer. In 1913 over four and a quarter millions of dollars were deposited by children in these banks in the United States. Price, paper, 5 cents.

The Educational directory for 1914-15, a valuable list in great demand in former years, has appeared as Bureau of Education Bulletin 43, 1914. It gives names and addresses of university and college presidents, other educational officials, and chief officers of education in foreign countries. Price, paper, 20 cents.

Hygienic Laboratory Bulletin 98—Digest of comments on the Pharmacopoeia of the United States of America (8th decennial revision), and on the National formulary (3d edition), calendar year 1913, is in stock. Price, paper, 50 cents.

In consideration of the present prevalence and increase of foot-and-mouth disease, the Bureau of Animal Industry has reprinted in pamphlet form the article from the 25th annual report entitled The 1908 outbreak of foot-and-mouth disease in the United States, by A. D. Melvin. It contains valuable material relative to diagnosis and treatment. Price, paper, 5 cents.

Among the important serials, just received, are Mineral resources, 1913, pt. 1, price, cloth, 70 cents, and Journals of the Continental Congress, vol. 22, Jan. 1-Aug. 9, 1782, price, cloth, \$1.00.

A reprint of historical interest is 63d Congress, 3d session, Senate document 711, which is, in fact, a reproduction of the Journal of the Joint Committee on Reconstruction, 39th Congress, 1st and 2d sessions, which was not printed until 1884, 48th Congress, shedding much light on some important happenings

during one of the most critical periods of American history. Price, paper, 5 cents.

A new edition of *Flags of maritime nations* is out. Price, \$1.50. It gives descriptions, with colored reproductions, of flags of all nations, and is used extensively by officers of the Navy and merchant marine, besides having educational value useful in the teaching of history and economics.

In connection with some misconceptions which may have arisen concerning the discontinuance of the bound volumes of the *Specifications and drawings of patents*, it should be noted that only the bound volumes were discontinued. The single copies are still issued in pamphlet or slip form at the date of granting the patent, and are sold at the Patent Office for 5 cents each.

New numbers in the series of *Special bulletins*, issued by the Department of Agriculture, are:

Dec. 28, 1914.—Making farm butter in the South; Shall southern farmers build creameries?

Dec. 31, 1914.—Conveniences for handling farm cow and her products; Production and care of milk and cream.

Jan. 12, 1915.—Soy beans in cotton belt.

## MARKETS AND RURAL ORGANIZATION OFFICE

**NOTE.**—The Markets Office was organized May 16, 1913, as a branch of the Secretary's Office, under authority of a paragraph in the miscellaneous section of the agricultural appropriation act approved Mar. 4, 1913.

In cooperation with the General Education Board of the Rockefeller Foundation, the Rural Organization Service of the Agriculture Department was organized in the fall of 1913. The work of this Service consisted of investigations in regard to the organization of agricultural communities upon a cooperative basis for the improvement of rural credit, educational, social, and hygienic conditions. The Service was financed by the General Education Board from the time of its organization to June 30, 1914. On July 1, 1914, the work of the Rural Organization Service was entirely taken over by the Agriculture Department under the authority contained in a paragraph among the miscellaneous appropriations of the agricultural appropriation act approved June 30, 1914.

Later the work of the Markets Office and of the Rural Organization Service was combined by the Secretary of Agriculture in one office, which was designated by him as the "Office of Markets and Rural Organization." The office at that time was established on the same footing as other bureaus and independent offices of the Department. It consists of "Marketing and Distribution Investigations" and "Rural Organization Investigations," both under the direction of the same administrative officer.

## GEOLOGICAL SURVEY

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers; and maps, Monographs, and folios of the Geologic atlas (issued in Library and Field editions) and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to \$11.00 each. A wholesale rate has been established for topographic and geologic folios (either Library or Field editions), whenever the sum transmitted solely for folios at the wholesale price amounts to at least \$5.10; that is, a discount of 40 per cent will be given whenever 34 or more folios that sell singly for 25c., or their equivalent in higher priced folios, are ordered at one time. Address the Director of the Geological Survey, Washington. For topographic sheets see p. 380.

### Maps

*Oregon.* State of Oregon. Scale 1:500,000. [Washington] Geological Survey, 1914. 39.4×52.4 in. † 35c.

### Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The usual size, exclusive of the margin, is about 17.5 inches in height by 11.5 to 16 inches in width, the latter varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

Nearly two-fifths of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 10c. each; but in lots of 50 or more copies, whether of the same sheet or of different sheets, the price is 6c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

*California.* California, Avena quadrangle, lat. 37° 45'–37° 52' 30'', long. 121°–121° 07' 30''. Scale 1:31,680, contour interval 5 ft. [Washington, Geological Survey] edition of Dec. 1914. 17.3×13.7 in. † 10c.

## TOPOGRAPHY DIVISION

NOTE.—Post route maps corrected to the 1st of those months are distributed in April, July, October, and January to the postal service. For a list of the maps composing the set, with prices, see below. Orders for the maps should be addressed to the Third Assistant Postmaster General, Finance Division, Washington, D. C., and money orders should be made payable to him.

Since February, 1908, the Topography Division has been preparing rural-delivery maps of counties in which rural-delivery is completely established. They are published in two forms, one giving simply the rural free delivery routes starting from a single given post office, sold at 5 cents each; the other, the rural free delivery routes in an entire county, sold at 20 cents each. A uniform scale of 1 inch to 1 mile is used. Editions are not issued, but sun-print copies are produced in response to special calls addressed to the Third Assistant Postmaster General, Finance Division. These maps should not be confused with the post route maps described in the preceding paragraph.

## SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis*, except as otherwise indicated. Publications should be ordered by the *publication number*, and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1, Smithsonian contributions to knowledge; 2, Smithsonian miscellaneous collections; 3, Smithsonian reports. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a

statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress."

The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution, but as they are usually regarded as public documents and have free transmission by mail they are listed in the Monthly catalogue.

## Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 63d Congress, 3d session, is to be understood.

# SALES OF GOVERNMENT PUBLICATIONS

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge, the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents are indicated by a star (\*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

## MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, \$1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

## LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and 1½c. for each additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

## INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate numbers can not be supplied.

## HOW TO REMIT

Remittances for the documents marked with a star (\*) should be made to the Superintendent of Documents, Washington, D. C., by coupons, postal money order, express order, or New York draft. Currency may be sent at sender's risk.

*Postage stamps, foreign money, defaced or smooth coins, positively will not be accepted.*

The coupon system has been reestablished. For the convenience of the general public, coupons that are good until used in exchange for Government publications sold by the Superintendent of Documents may be purchased from his Office in sets of 20 for \$1.00. Address order to Superintendent of Documents, Government Printing Office.

No charge is made for postage on documents forwarded to points in United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

## NOTES OF GENERAL INTEREST

An attractive book listed in this catalogue is Report of Alaska investigations in 1914, by E. Lester Jones, Deputy Commissioner of Fisheries. It details the investigations made during the last year, and relates principally to the fisheries, although some attention is given to fur-bearing animals. The salmon industry is covered at length, with references to modes of catching, canning, and shipping, embracing the work of the Fisheries Bureau on propagation. Information relative to propagation, catching, and marketing of fur-bearing animals is given, including the famous silver fox; an interesting publication, rendered more so by the numerous fine photographic illustrations. Price, paper, 50 cents.

The Bureau of Mines has published a practical work as Bulletin 87, Houses for mining towns, with valuable hints on construction, planning, sanitation, etc., and articles on the selection of town sites and the arrangement of towns. Price, paper, 15 cents.

Bulletin 90 of the Bureau of Mines—Abstract of current decisions on mines and mining, Dec. 1913–Sept. 1914, by J. W. Thompson—is an adjunct to the legal literature of mining, covering minerals and mineral lands, mining operations, claims, leases, water rights, etc. Price, paper, 20 cents.

Technical paper 80 of the same Bureau—Hand firing soft coal under power-plant boilers, by Henry Kreisinger—is a practical dissertation on the proper handling of fuel with the object of increasing efficiency. Detailed drawings are supplied. Price, paper, 10 cents.

Bulletin 47, 1914, Bureau of Education, City training schools for teachers, by Frank A. Manny, outlines a training system having for its object improvement in the efficiency of teachers in both city and county. Price, paper, 20 cents.

Special agents series 91, Bureau of Foreign and Domestic Commerce—Pineapple-canning industry of the world—throws some light on an important and growing industry, covering the producing districts of the world, and notably our island possessions, Hawaii and the Philippines. The entry for this publication was in the Monthly catalogue for Jan. 1915, page 354. Price, paper, 5 cents.

Special agents series 93, issued by the Bureau of Foreign and Domestic Commerce—Canned-tomato industry in Italy—tells of the rapid strides the industry has made, and is interesting in connection with comparisons of the business as it is carried on in the United States. It embraces a description of the varieties cultivated, modes of culture, and methods of canning, with some interesting sidelights of value to American packers. Price, paper, 5 cents.

Special agents series 92 also relates to canned goods, bearing the title Canned-goods trade in the far East, and giving hints to American shippers by means of notes on demands, marketing, and suggestions for development in China, Japan, Siam, Straits Settlements, Dutch East Indies, Ceylon, Egypt, and the Philippines. Price, paper, 10 cents.

The Children's Bureau has published no. 3 of Infant mortality series—Infant mortality, results of a field study in Johnstown, Pa., for one year, by Emma Duke. It looks into such matters as relation of infant mortality to environment, nationality, mothers, feeding, sex, etc., with general tables. Price, paper, 20 cents.

Another interesting publication by the Fisheries Bureau is Bulletin, vol. 32, 1912, now available, containing articles on salmon, trout, fresh water mussels, and kindred subjects. Price, cloth, \$1.85.

Protection from sudden devastation caused by frost is a vital question with horticulturists, especially fruit producers, and along this line the Weather Bureau has reprinted Papers on frosts and frost protection in the United States from the Monthly weather review of Oct. 1914, covering general considerations, conditions favorable to frost, selection of fruit and location, utilization of frost warnings, frost prevention, drainage, and other related matters.

Circular 46, Secretary's Office, Department of Agriculture, entered in this catalogue under Markets and Rural Organization Office, is Rules and regulations of Secretary of Agriculture under the United States cotton futures act of Aug. 18, 1914, construing the terms of the act, section by section, under five regulations headed definitions, disputes, spot markets, commercial differences, and publications, with full text of the act. Price, paper, 5 cents.

Bulletin 17, Copyright Office, Library of Congress, covers Decisions of the United States courts involving copyright, 1913-14, and is a valuable addition to the legal literature of copyright practice. Price, paper, 10 cents.

The Bureau of Standards is constantly adding to its technical library, and late issues are Scientific paper 241, Wheatstone bridge for resistance thermometry, price, paper, 20 cents, and Scientific paper 245, Temperature coefficient of magnetic permeability within the working range, price, paper, 5 cents.

The Bureau of Navigation, Department of Commerce, has issued a reprint of Radio communication laws of United States and the international radiotelegraphic convention, dated July 27, 1914, with addenda to the previous edition inserted. Price, paper, 15 cents.

Coffee is affected by fungus diseases, and the Porto Rico Agricultural Experiment Station has given the result of investigations thereon in Bulletin 17, Fungus diseases of coffee in Porto Rico. Price, paper, 10 cents.

The art of cooking has lately received much scientific and practical study, and the Bureau of Education has published Bulletin 1, 1915, Cooking in the vocational school as training for home making, by Iris Prouty O'Leary, as an adjunct to the teaching material on the subject, embracing instruction, courses and materials needed. Price, paper, 5 cents.

Mines Bureau Technical paper 95, Mining and milling of lead and zinc ores in the Wisconsin district, covers prospecting and mining methods, ore dressing, waste, accidents, and health conditions. Price, paper, 10 cents.

The Bureau of Chemistry has published a revision of Circular 61, How to kill and bleed market poultry, which gives concise directions for the killing of poultry in such a manner as to insure proper condition for marketing. Price, paper, 5 cents.

Public health bulletin 67, Transactions of the twelfth annual Conference of State and Territorial Health Officers with the United States Public Health Service, Washington, D. C., June 16, 1914, is really the minutes of the meeting, including morbidity returns, sanitation of public conveyances, quarantine, and transportation of tuberculous persons, with discussions. This was listed in the January Monthly catalogue. Price, paper, 10 cents.

The annual report of the Secretary of the Treasury on the state of the finances for fiscal year ended June 30, 1914, covers all Governmental finance, containing a general report, with articles on special topics, such as the European war crisis, and Reports of the Treasurer, Director of Mint, Comptroller of Currency, Register, and Commissioner of Internal Revenue, with accompanying tables. Price, cloth, 55 cents.

The annual report of the Commissioner General of Immigration is of unusual importance by reason of the current interest in the subject covered. It contains 408 pages of matter, and gives a clear insight into immigration conditions. This, also, was entered in the catalogue for Jan. 1915. Price, paper, 30 cents.

The War Department, Office of Quartermaster General, published in January a Report on fuel tests and issue of fuel, 1914, covering Army practices, tests, instructions, etc., with some interesting maps showing zones of equal temperatures. Price, cloth, \$1.00.

Entomology Bureau Bulletin 94, pt. 2, is a part of the Insects injurious to forests and forest products series, entitled Biology of the termites of eastern United States, with preventive and remedial measures, and deals with forest preservation through the eradication of destructive insects. Price, paper, 20 cents.

The first annual report of the Federal Reserve Board, for period ending Dec. 31, 1914, is out, covering organization, problems, and work of the Board. It is of interest because it gives first glimpses of the workings of our new financial system. Price, paper, 15 cents.

The Catalogue Division, Library of Congress, has published a List of American doctoral dissertations printed in 1913. Price, cloth, 30 cents.

Supplement 18 to Public health reports—Malaria, lessons on its cause and prevention, for use in schools—contains practical instruction for school teachers, instructing pupils as to common diseases, their cause and prevention. Price, paper, 10 cents.

Geological Survey Water-supply paper 338, Springs of California, is a 410 page article on the subject, embracing physical features, natural waters, and analyses. A comprehensive work. Price, paper, 60 cents.

The Distribution of fish and fish eggs during the fiscal year 1914, issued by the Bureau of Fisheries, gives an idea as to the extensive work of the Bureau in the general conservation of the fisheries. Price, paper, 15 cents.

Supplement 31a to Commerce reports is a report from Consul Walter F. Boyle on the Ceiba District, Honduras, embracing harbor facilities, climatic conditions, railroads, steamship connections, effect of European war, exports, etc.

The latest issues now available of bound series published by the Government are as follows:

Index-catalogue of library of Surgeon General's Office, United States Army, authors and subjects. Second series. Vol. 19, U-Uzielli. Price, cloth, \$2.00.

Treasury decisions under customs and other laws, vol. 27, July-Dec. 1914. Price, cloth, \$1.50.

Interstate Commerce Commission reports, vol. 30, Mar.-June, 1914. Price, cloth, \$1.50.

Mineral resources of United States, pt. 2, Nonmetals, 1913. Price, cloth, \$1.25.

Journals of the Continental Congress, vol. 23, Aug. 12-Dec. 31, 1782. Price, cloth, \$1.00.

Addition to the series of Special circulars issued by the Department of Agriculture: Cowpeas in the cotton belt.

#### JITNEY BOOKS

Some of the most valuable publications of the Government are issued in pamphlet form, usually treating some current subject practically, conveying in a nontechnical manner information readily understood, and besides, the form of publication places the information within reach of all, the price usually being 5 cents.

In this class are the reprints from the Public health reports, the Farmers' bulletins, the Bulletins of the Department of Agriculture, and the monographs issued by the Indian Affairs Office. Notable additions to these series follow.

## REPRINTS FROM PUBLIC HEALTH BULLETINS

## MARKETS AND RURAL ORGANIZATION OFFICE

NOTE.—The Markets Office was organized May 16, 1913, as a branch of the Secretary's Office, under authority of a paragraph in the miscellaneous section of the agricultural appropriation act approved Mar. 4, 1913.

In cooperation with the General Education Board of the Rockefeller Foundation, the Rural Organization Service of the Agriculture Department was organized in the fall of 1913. The work of this Service consisted of investigations in regard to the organization of agricultural communities upon a cooperative basis for the improvement of rural credit, educational, social, and hygienic conditions. The Service was financed by the General Education Board from the time of its organization to June 30, 1914. On July 1, 1914, the work of the Rural Organization Service was entirely taken over by the Agriculture Department under the authority contained in a paragraph among the miscellaneous appropriations of the agricultural appropriation act approved June 30, 1914.

Later the work of the Markets Office and of the Rural Organization Service was combined by the Secretary of Agriculture in one office, which was designated by him as the "Office of Markets and Rural Organization." The office at that time was established on the same footing as other bureaus and independent offices of the Department. It consists of "Marketing and Distribution Investigations" and "Rural Organization Investigations," both under the direction of the same administrative officer.

### Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The usual size, exclusive of the margin, is about 17.5 inches in height by 11.5 to 16 inches in width, the latter varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

Nearly two-fifths of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 10c. each; but in lots of 50 or more copies, whether of the same sheet or of different sheets, the price is 6c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

## SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis*, except as otherwise indicated. Publications should be ordered by the publication number, and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1, Smithsonian contributions to knowledge; 2, Smithsonian miscellaneous collections; 3, Smithsonian reports. No sets of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to

public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress."

The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution, but as they are usually regarded as public documents and have free transmission by mail they are listed in the Monthly catalogue.

† Distribution by office issuing document, free if unaccompanied by a price.

‡ Document not obtainable.

## Explanation

Words and figures inclosed in brackets [] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 63d Congress, 3d session, is to be understood.

# SALES OF GOVERNMENT PUBLICATIONS

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge, the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents are indicated by a star (\*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

## MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, \$1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

## LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and  $\frac{1}{2}$ c. for each additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

## INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate numbers can not be supplied.

## HOW TO REMIT

Remittances for the documents marked with a star (\*) should be made to the Superintendent of Documents, Washington, D. C., by coupons, postal money order, express order, or New York draft. Currency may be sent at sender's risk.

*Postage stamps, foreign money, defaced or smooth coins, positively will not be accepted.*

The coupon system has been reestablished. For the convenience of the general public, coupons that are good until used in exchange for Government publications sold by the Superintendent of Documents may be purchased from his Office in sets of 20 for \$1.00. Address order to Superintendent of Documents, Government Printing Office.

No charge is made for postage on documents forwarded to points in United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

## NOTES OF GENERAL INTEREST

Organization of a rural community, by T. N. Carver, printed as Yearbook separate 632, advanced from the Yearbook for 1914, is one of the most timely books of the month. Everything is being organized and systematized, and country communities are awakening to the advantage of concerted action in communal affairs. The work deals with the subject under two main heads—Business interests, and Social interests, and gives outlines for work of committees on production, marketing, accounting, education, sanitation, recreation and other special features. Price, paper, 5 cents.

Department of Agriculture Report 103, Social and labor needs of farm women, takes up a long mooted question—the question of woman's life on the farm. It consists of extracts from letters received from farm women in response to an inquiry, "How the United States Department of Agriculture can better meet the needs of farm housewives." Price, paper, 15 cents.

A compilation of note, in connection with the present agitation against the improper use of drugs, is Opium and narcotic laws, containing public no. 221, 60th Congress; public no. 46, 63d Congress; public no. 47, 63d Congress, and public no. 223, 63d Congress, the last mentioned being popularly known as the "Harrison anti-narcotic law." It was ordered printed by the House Document Room. Price, paper, 5 cents.

The report on the Colorado strike investigation, made under House resolution 387, 63d Congress, 3d session, has appeared as 63d Congress, 3d session, House document 1630. It embodies the result of the inquiry made by the Committee on Mines and Mining, with extracts from the testimony, and the views of Representative Byrnes of South Carolina, and Mr. R. W. Austin. Price, paper, 5 cents.

A valuable work, both from the technical and practical standpoints, is Circular 53, of the Bureau of Standards, Composition, properties, and testing of printing inks—giving an historical review of the subject, followed by articles on composition, manufacture, grading, and analysis, embracing oils, pigments, driers, and formulas, augmented by a comprehensive bibliography. Price, paper, 10 cents.

Bulletin of Bureau of Labor Statistics, whole no. 158, listed in the February Monthly catalogue, page 471, takes up a phase of the housing problem under the title, Government aid to home owning and housing of working people in foreign countries, and is a practical study of the subject, covering 445 pages, with an index. Price, paper, 45 cents.

Current publications of the Labor Statistics Bureau are, Bulletin 164, Butter prices, from producer to consumer. Price, paper, 10 cents. Bulletin 163, Wages and hours of labor in the building and repairing of steam railroad cars, 1907-13. Price, paper, 10 cents. Bulletin 161, Wages and hours of labor in the clothing and cigar industries, 1911-13. Price, paper, 10 cents.

Supplement 18 to Public health reports, Malaria, lessons on its cause and prevention for use in schools, forms one of a series on causes and prevention of common ailments, published by the Public Health Service, its object being to

enlighten school children as to this all prevailing disease, and it is arranged in the form of a catechism, the questions and answers shaped as simply as possible, with some introductory instructions for teachers, also some figures showing the insects concerned in the promulgation of the malady. Price, paper, 10 cents.

Surgeon General's Bulletin 7, (Medical Department, Army) is entitled Bulletin on studies in Roentgen-ray diagnosis, with especial reference to the gastrointestinal tract, by A. C. Christie, and gives interesting studies of many cases, with numerous illustrations. Price, paper, 30 cents.

The report of the ninth annual Conference on Weights and Measures of the United States has been published by the Bureau of Standards. Price, paper, 20 cents.

The Annual report of the Comptroller of the Currency, 1914, vol. 2, is now available, covering the usual ground. It contains the reports from the national banks of the country, also Digest of decisions relating to national banks, etc. Price, 60 cents, cloth.

An interesting historical work has just emanated from the Indian Affairs Office, Department of the Interior, bearing the title Official correspondence of James S. Calhoun, while Indian agent at Santa Fé and superintendent of Indian affairs in New Mexico, edited by Annie H. Abel. Price, cloth, 70 cents.

Department of Agriculture Report 101, Woolly apple aphid, relates to one of the most troublesome and widely distributed apple pests. It is an intimate study of its life history. Price, paper, 20 cents.

Bulletin of Bureau of Labor Statistics, whole no. 165, Lead poisoning in the manufacture of storage batteries, is a study of the processes of manufacture, hygienic conditions, wages, and danger involved. Price, paper, 10 cents.

A statistical volume from the United States Census Office of interest to sociologists, students, etc., is Paupers in almshouses, 1910, with tables showing age, sex, marital conditions, nationality, etc. Price, cloth, 50 cents.

Among the publications of the Education Bureau for this last month are the following bulletins:

## GEOLOGICAL SURVEY

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers; and maps. Monographs, and folios of the Geologic atlas (issued in Library and Field editions) and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to \$11.00 each. A wholesale rate has been established for topographic and geologic folios (either Library or Field editions), whenever the sum transmitted solely for folios at the wholesale price amounts to at least \$5.10; that is, a discount of 40 per cent will be given whenever 34 or more folios that sell singly for 25c., or their equivalent in higher priced folios, are ordered at one time. Address the Director of the Geological Survey, Washington. For topographic sheets see next page.

### Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The usual size, exclusive of the margin, is about 17.5 inches in height by 11.5 to 16 inches in width, the latter varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

Nearly two-fifths of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 10c. each; but in lots of 50 or more copies, whether of the same sheet or of different sheets, the price is 6c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

## SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis*, except as otherwise indicated. Publications should be ordered by the *publication number*, and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1. Smithsonian contributions to knowledge; 2. Smithsonian miscellaneous collections; 3. Smithsonian reports. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress."

The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution, but as they are usually regarded as public documents and have free transmission by mail they are listed in the Monthly catalogue.

\* Document for sale by Superintendent of Documents.

† Distribution by office issuing document, free if unaccompanied by a price.

‡ Document not obtainable.

## Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 63d Congress, 3d session, is to be understood.

# SALES OF GOVERNMENT PUBLICATIONS

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge, the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents are indicated by a star (\*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

## MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, \$1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

## LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and  $\frac{1}{2}$ c. for each additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

## INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate numbers can not be supplied.

## HOW TO REMIT

Remittances for the documents marked with a star (\*) should be made to the Superintendent of Documents, Washington, D. C., by coupons, postal money order, express order, or New York draft. Currency may be sent at sender's risk.

*Postage stamps, foreign money, defaced or smooth coins, positively will not be accepted.*

The coupon system has been reestablished. For the convenience of the general public, coupons that are good until used in exchange for Government publications sold by the Superintendent of Documents may be purchased from his Office in sets of 20 for \$1.00. Address order to Superintendent of Documents, Government Printing Office.

No charge is made for postage on documents forwarded to points in United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged and remittances must cover such postage.

## GEOLOGICAL SURVEY

**NOTE.**—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers; and maps. Monographs, and folios of the Geologic atlas (issued in Library and Field editions) and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to \$11.00 each. A wholesale rate has been established for topographic and geologic folios (either Library or Field editions), whenever the sum transmitted solely for folios at the wholesale price amounts to at least \$5.10; that is, a discount of 40 per cent will be given whenever 34 or more folios that sell singly for 25c., or their equivalent in higher priced folios, are ordered at one time. Address the Director of the Geological Survey, Washington. For topographic sheets see next page.

### Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1:62,500, 1:125,000, and 1:250,000. These correspond approximately to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The usual size, exclusive of the margin, is about 17.5 inches in height by 11.5 to 16 inches in width, the latter varying with the latitude. A description of the topographic map is printed on the reverse of each sheet. Nearly two-fifths of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 10c. each; but in lots of 50 or more copies, whether of the same sheet or of different sheets, the price is 6c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

## TOPOGRAPHY DIVISION

NOTE.—Since February, 1908, the Topography Division has been preparing rural-delivery maps of counties in which rural delivery is completely established. They are published in two forms, one giving simply the rural free delivery routes, starting from a single given post office, sold at 5 cents each; the other, the rural free delivery routes in an entire county, sold at 20 cents each. A uniform scale of 1 inch to 1 mile is used.

Editions are not issued, but sun-print copies are produced in response to special calls addressed to the Third Assistant Postmaster General, Finance Division, Washington, D. C. These maps should not be confused with the post route maps for which see Monthly catalogue for January, 1915, page 394.

## SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis*, except as otherwise indicated. Publications should be ordered by the *publication number*, and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1, Smithsonian contributions to knowledge; 2, Smithsonian miscellaneous collections; 3, Smithsonian reports. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress."

The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution, but as they are usually regarded as public documents and have free transmission by mail they are listed in the Monthly catalogue.

\* Document for sale by Superintendent of Documents.

† Distribution by office issuing document, free if unaccompanied by a price.

‡ Document not obtainable.

## Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 63d Congress, 3d session, is to be understood.

# SALES OF GOVERNMENT PUBLICATIONS

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents are indicated by a star (\*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

## MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, \$1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

## LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and  $\frac{1}{10}$ c. for each additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

## INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate numbers can not be supplied.

## HOW TO REMIT

Remittances for the documents marked with a star (\*) should be made to the **Superintendent of Documents, Washington, D. C.**, by coupons, postal money order, express order, or New York draft. Currency may be sent at sender's risk.

*Postage stamps, foreign money, defaced or smooth coins, positively will not be accepted.*

The coupon system has been reestablished. For the convenience of the general public, coupons that are good until used in exchange for Government publications sold by the Superintendent of Documents may be purchased from his Office in sets of 20 for \$1.00. Address order to Superintendent of Documents, Government Printing Office.

No charge is made for postage on documents forwarded to points in United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged and remittances must cover such postage.

### GEOLOGICAL SURVEY

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers; and maps, Monographs, and folios of the Geologic atlas (issued in Library and Field editions) and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to \$11.00 each. A wholesale rate has been established for topographic and geologic folios (either Library or Field editions), whenever the sum transmitted solely for folios at the wholesale price amounts to at least \$5.10; that is, a discount of 40 per cent will be given whenever 34 or more folios that sell singly for 25c., or their equivalent in higher priced folios, are ordered at one time. Address the Director of the Geological Survey, Washington. For topographic sheets see next page.

### Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1 : 62,500, 1 : 125,000, and 1 : 250,000. These correspond, approximately to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The usual size, exclusive of the margin is about 17.5 inches in height by 11.5 to 16 inches in width, the latter varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

Nearly two-fifths of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 10c. each; but in lots of 50 or more copies, whether of the same sheet or of different sheets, the price is 6c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

## SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis*, except as otherwise indicated. Publications should be ordered by the *publication number*, and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1, Smithsonian contributions to knowledge; 2, Smithsonian miscellaneous collections; 3, Smithsonian reports. No sets of these are for sale or distribution, as most of the volumes are out of print. The Contributions to knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress."

The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution, but as they are usually regarded as public documents and have free transmission by mail they are listed in the Monthly catalogue.

‡ Document not obtainable.

## Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 63d Congress, 3d session, is to be understood.

# SALES OF GOVERNMENT PUBLICATIONS

The Superintendent of Documents, Washington, D. C., is authorized to sell at cost of paper and printing any United States public document in his charge the distribution of which is not otherwise provided for.

Publications can not be supplied free to individuals nor forwarded in advance of payment.

Publications entered in this catalogue that are for sale by the Superintendent of Documents are indicated by a star (\*) preceding the price. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document. A double dagger (‡) indicates that the document is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau by which it was published. The Senate and House documents and reports are issued in limited editions and, unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing Department, Bureau, or Division, and the title of the publication. If the publication is numbered, give the number also. Every such particular assists in quick identification. Do not order by the Library of Congress card number.

The accumulation of publications in this Office amounts to several millions, of which over a million are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity. Many of the books have been in stock some time and are apt to be shop-worn. In filling orders the best copy available is sent. A general price-list of public documents is not available, but lists on special subjects will be furnished on application.

## MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, Resident Commissioner, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, \$1.10 a year, including index. Back numbers can not be supplied. Notify the Superintendent of Documents of any change of address.

## LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and  $\frac{1}{2}$ c. for each additional card for the same title ordered at the same time. Remittances for the L. C. catalogue cards should be made to the Librarian of Congress. They can not be furnished by the Superintendent of Documents.

## INDEX

An Index to the Monthly catalogue is issued at the end of the fiscal year. This contains index entries for all the numbers issued from July to June, and can be bound with the numbers as an index to the volume. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate numbers can not be supplied.

## HOW TO REMIT

Remittances for the documents marked with a star (\*) should be made to the Superintendent of Documents, Washington, D. C., by coupons, postal money order, express order, or New York draft. Currency may be sent at sender's risk.

*Postage stamps, foreign money, defaced or smooth coins, positively will not be accepted.*

The coupon system has been reestablished. For the convenience of the general public, coupons that are good until used in exchange for Government publications sold by the Superintendent of Documents may be purchased from his Office in sets of 20 for \$1.00. Address order to Superintendent of Documents, Government Printing Office.

No charge is made for postage on documents forwarded to points in United States, Alaska, Guam, Hawaii, Philippine Islands, Porto Rico, Samoa, or to Canada, Cuba, Mexico, or Shanghai. To other countries the regular rate of postage is charged, and remittances must cover such postage.

## GEOLOGICAL SURVEY

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers; and maps, Monographs, and folios of the Geologic atlas (issued in Library and Field editions) and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to \$11.00 each. A wholesale rate has been established for topographic and geologic folios (either Library or Field editions), whenever the sum transmitted solely for folios at the wholesale price amounts to at least \$5.10; that is, a discount of 40 per cent will be given whenever 34 or more folios that sell singly for 25c., or their equivalent in higher priced folios, are ordered at one time. Address the Director of the Geological Survey, Washington. For topographic sheets see next page.

### Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The usual size, exclusive of the margin, is about 17.5 inches in height by 11.5 to 16 inches in width, the latter varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

Nearly two-fifths of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 10c. each; but in lots of 50 or more copies, whether of the same sheet or of different sheets, the price is 6c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

## SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this notice: "Applicants for these publications are requested to state the grounds for their requests, as the Institution is able to supply papers only as an aid to the researches or studies in which applicants are especially interested. The papers included in this list are distributed *gratis*, except as otherwise indicated. Publications should be ordered by the publication number, and arranged in sequence. The serial publications of the Smithsonian Institution are as follows: 1, Smithsonian contributions to knowledge; 2, Smithsonian miscellaneous collections; 3, Smithsonian reports. No sets of these are for sale or distribution, as most of the volumes are out of print. The Contributions to Knowledge and Miscellaneous collections are distributed without charge only to public libraries, learned societies, institutions, and specialists in this country and abroad. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remain to supply other demands. No general mailing-list of individuals is maintained. The reports can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittances for publications not distributed gratuitously should be made payable to the 'Smithsonian Institution.' Applications from libraries should be accompanied by a statement of the number of volumes which they contain and the date of their establishment, and should have the endorsement of a Member of Congress."

The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution, but as they are usually regarded as public documents and have free transmission by mail they are listed in the Monthly catalogue.
